Alharbi,2021-07-05 This new volume looks at the applications of biomarkers as important tools for herbal drug discovery presenting research on phytoconstituents with advanced nanotechnological applications for healthcare benefits Herbal drug discovery based on biomarkers is an emerging area in complementary and alternative medicine that has tremendous potential in healthcare Conventional medications have limited efficacy and high toxicity whereas herbal drugs are said to provide wide structural diversity that is not usually seen with conventional synthetic drug molecules Recognition of various herbal constituents such as terpenoids fatty acids flavonoids

and steroids are well explored in the management and treatment of various disorders in this volume. These agents target various biomarkers such as nitric oxide (NO), cytokines, chemokines, adhesion molecules, NF- $\kappa$ B, lipoxygenase (LOX), and arachidonic acid. Biomarkers as Targeted Herbal Drug Discovery: A Pharmacological Approach to Nanomedicines discusses phytoconstituent-based nanotherapeutics with applications for some specific health issues such as arthritis, leishmanicidal, cardiovascular diseases, cancer, and ocular disorders, etc.

#### Colloidal Synthesis of Plasmonic Nanometals Luis

Liz-Marzán, 2020-04-23. Noble metal nanoparticles have attracted enormous scientific and technological interest because of their unique optical properties which are related to surface plasmon resonances. The interest in nanosized metal particles dates back to ancient societies when metals were used in various forms as decorative elements. From the famous Lycurgus cup made by the Romans in the 4th century AD through thousands of stained glasses in churches and cathedrals all over medieval Europe, bright yellow, green, or red colors have been obtained by a touch of metallic additions during glass blowing. This peculiar interaction of light with nanometals can be widely tuned through the morphology and assembly of nanoparticles, thereby expanding the range of potential applications from energy and information storage to biomedicine, including novel diagnostic and therapeutic methods. This book compiles recent developments that clearly illustrate the state of the art in this cutting-edge research field. It comprises different review articles written by the teams of Prof. Luis Liz-Marzán, an international leader in chemical nanotechnology who has made seminal contributions to the use of colloid chemistry methods to understand and tailor the growth of metal particles at the nanoscale. Apart from synthesis, the book also describes in detail the plasmonic properties of nanomaterials and illustrates some representative applications. This book will appeal to anyone involved in nanotechnology, nanocrystal growth, nanoplasmonics, and surface-enhanced spectroscopies.

#### Nanoparticulates As Drug Carriers Vladimir P. Torchilin, 2006-09-29

Written by key experts in the field of nanomedicine, this book provides a broad introduction to the important field of nanomedicine and application of nanotechnology for drug delivery. It covers up-to-date information regarding various nanoparticulate drug delivery systems, describes the various opportunities for the application of nanoparticulate drug carriers in different areas of clinical medicine, and analyzes already available information on their clinical applications. This book can be used as an advanced textbook by graduate students and young scientists and clinicians at the early stages of their career. It is also suitable for non-experts from related areas of chemistry, biochemistry, molecular biology, biomedical engineering, physiology, experimental and clinical medicine, and pharmaceutical sciences who are interested in general problems of drug delivery and drug targeting, as well as in more specialized topics of using nanoparticulate-mediated drug delivery approaches in the individual areas of clinical medicine. Prof. Torchilin is an expert in nanomedicine and a recipient of numerous awards, including the Lenin Prize in Science Technology of the former USSR, membership in the European Academy of Sciences, and AAPS Research Achievement Award in Pharmaceutics and Drug Delivery. He served as an Associate Professor of Radiology at Harvard Medical School before joining Northeastern University.
