He is a prominent representative of contemporary pragmatism who has made a great deal of contributions to the study of this topic. This area is crucial for science and it has been little considered in the philosophy of science.

*Rescher on Rationality, Values, and Social Responsibility* Nicholas J. Moutafakis, 2013-05-02 Nicholas Rescher stands as a major figure in American Philosophy today. His philosophical contribution ranging over fifty years is marked by a profound respect for the fate of the human condition in a world of unparalleled scientific and technological innovation. This work brings under the centrally unifying theme of rationality some of the issues on values and personal responsibility he has addressed during his long and distinguished career. The book is intended to illustrate the synthesis of Rescher's thinking relative to these ideas as expounded upon for many decades.

**New Approaches to Scientific Realism** Wenceslao J.

Gonzalez, 2020-08-24 Scientific realism is at the core of the contemporary philosophical debate on science. This book analyzes new versions of scientific realism. It makes explicit the advantages of scientific realism over alternatives and antagonists, contributes to deciding which of the new approaches better meets the descriptive and the prescriptive criteria, and expands the philosophico-methodological field to take in new topics and disciplines.

*A System of Pragmatic Idealism* Nicholas

Rescher, 1992

*Pragmatism and Objectivity* Sami Pihlström, 2017-02-17 Pragmatism and Objectivity illuminates the nature of contemporary pragmatism against the background of Rescher's work, resulting in a stronger grasp of the prospects and promises of this philosophical movement. The central insight of pragmatism is that we must start from where we find ourselves and deflate metaphysical theories of truth in favor of an account that reflects our actual practices of the concept. Pragmatism links truth and rationality to experience, success, and action. While crude versions of pragmatism state that truth is whatever works for a person or a community, Nicholas Rescher has been at the forefront of arguing for a more sophisticated pragmatist position. According to his position, we can illuminate a robust concept of truth by considering its links with inquiry, assertion, belief, and action. His brand of pragmatism is objective and organized around truth and inquiry rather than other forms of pragmatism that are more subjective and lenient. The contingency and fallibility of knowledge and belief formation does not mean that our beliefs are simply what our community decides or that truth and objectivity are spurious notions. Rescher offers the best chance of understanding how it is that beliefs can be the products of human inquiry yet aim at the truth nonetheless. The essays in this volume, written by established and up-and-coming scholars of pragmatism, touch on themes related to epistemology, philosophy of mind, philosophy of science, and ethics.

*Rescher Studies* Robert Almeder, 2013-05-02 In a career extending over almost six decades, Nicholas Rescher has conducted researches in almost every principal area of philosophy, historical and systematic alike. In this extraordinary volume, two dozen scholars join in

offering penetrating discussions of various facets of Rescher's investigations. The result is an instructively critical panorama of the many faceted contributions of this important American philosopher. Born in Germany in 1928, Nicholas Rescher came to the U.S. at the age of nine. He is University Professor of Philosophy at the University of Pittsburgh, where he has also served as Chairman of the Philosophy Department and as director and currently chairman of the Center for Philosophy of Science. In a productive research career extending over six decades, he has established himself as a systematic philosopher of the old style. His work represents a many-sided approach to fundamental philosophical issues that weaves together threads of thought from continental idealism and American pragmatism. And apart from this larger program, Rescher has made various specific contributions to logic, the conception of autodescriptive systems, many-sided logic, the history of logic, the medieval Arabic theory of modal syllogistic, the theory of knowledge, epistemology, as a quantitative approach in theoretical epistemology, and to the philosophy of science, the theory of a logarithmic retardation of scientific progress. Rescher has also worked in the area of futuristics and, along with Olaf Helmer and Norman Dalkey, is co-inaugurator of the so-called Delphi method of forecasting. Ten books about Rescher's philosophy have been published in four languages. Rescher earned his doctorate at Princeton in 1951, while still at the age of twenty-two, a record for Princeton's Department of Philosophy. He has served as a President of the American Philosophical Association, the American Catholic Philosophy Association, the American G.W. Leibniz Society, the C.S. Peirce Society, and of the American Metaphysical Society. He was the founder of the American Philosophical Quarterly. An honorary member of Corpus Christi College, Oxford, he has been elected to membership in the European Academy of Arts and Sciences, Academia Europaea, the Royal Society of Canada, the Institut International de Philosophie, and several other learned academies. Having held visiting lectureships at Oxford, Constance, Salamanca, Munich, and Marburg, he has been awarded fellowships by the Ford, Guggenheim, and National Science Foundations. Author of some hundred books ranging over many areas of philosophy, over a dozen of them translated from English into other languages, he is the recipient of eight honorary degrees from universities on three continents. He was awarded the Alexander von Humboldt Prize for Humanistic Scholarship in 1984, the Belgian Prix Mercier in 2005, and the Aquinas Medal of the American Catholic Philosophical Association in 2007.

Making Moral Sense Logi Gunnarsson, 2000-09-18 Is it rational to be moral Can moral disputes be settled rationally Which criteria determine what we have a good reason to do In this innovative book Logi Gunnarsson takes issue with the assumption made by many philosophers faced with the problem of reconciling moral norms with a scientific world view namely that morality must be offered a non moral justification based on a formal concept of rationality He argues that the criteria for the rationality of an action are irreducibly substantive rather than purely formal and that assuming that morality must be given a non moral justification amounts to a distortion of both rationality and morality His discussion includes substantial critical engagement with major thinkers from two very different philosophical traditions and is notable for its clear and succinct account of Habermas discourse ethics It will appeal to anyone interested in practical reason and the rational credentials of morality

Realism, Value, and Transcendental Arguments between Neopragmatism and Analytic Philosophy Sami Pihlström, 2023-05-05 The essays collected in this volume and authored by Sami Pihlström emphasize that our relation to the world we live in and seek to represent and get to know better through our practices of conceptualization and inquiry is irreducibly valuational There is no way of even approaching let alone resolving the philosophical issue of realism without

drawing due attention to the ways in which human values are inextricably entangled with even the most purely factual projects of inquiry we engage in This entanglement of the factual and the normative is as explicitly argued in Chapter 7 but implicitly suggested in all the other chapters as well both pragmatic practice embedded and practice involving and transcendental operating at the level of the necessary conditions for the possibility of our representing and cognizing the world in general The author claims we need to carefully examine the complex relations of realism value and transcendental arguments at the intersection of pragmatism and analytic philosophy This book does so by offering case studies of various important neopragmatists and philosophers close to the pragmatist tradition including Hilary Putnam Nicholas Rescher Joseph Margolis and Ludwig Wittgenstein It appeals to scholars and advanced graduate students focusing on pragmatism and analytic philosophy
