Complicity and its Limits in the Law of International Responsibility Vladyslav Lanovoy, 2016-09-22 This book examines the responsibility of States and international organizations for complicity aid or assistance in an internationally wrongful act Despite the recognition of responsibility for complicity as a rule of customary international law by the International Court of Justice this book argues that the effectiveness and utility of this form of responsibility is fraught with systemic and operational limits These limits include a lack of clarity in its constituent elements its co existence with primary rules prohibiting complicity and the obligations of due diligence its implementation and the underlying causal tests its uncertain relationship to other forms of shared and indirect responsibility and its potential as a form of attribution of conduct This book submits that the content and elements of this form of responsibility need adjustments to respond more effectively to the phenomenon of complicity in international affairs Awarded The Paul Guggenheim Prize in International Law 2017 **The**

Responsibility to Protect in International Law Susan Breau, 2016-03-02 This book will consider a rapidly emerging guiding general principle in international relations and arguably in international law the Responsibility to Protect This principle is a solution proposed to a key preoccupation in both international relations and international law scholarship how the international community is to respond to mass atrocities within sovereign States There are three facets to this responsibility the responsibility to prevent the responsibility to react and the responsibility to rebuild This doctrine will be analysed in light of the parallel development of customary and treaty international legal obligations imposing responsibilities on sovereign states to the international community in key international law fields such as international human rights law international criminal law and international environmental law These new developments demand academic study and this book fills this lacuna by rigorously considering all of these developments as part of a trend towards assumption of international responsibility This must include the responsibility on the part of all states to respond to threats of genocide crimes against humanity ethnic cleansings and large scale war crimes The discussion surrounding aggravated state responsibility is also explored with the author concluding that this emerging norm within international law is closely related to the responsibility to protect in its imposition of an international responsibility to act in response to an international wrong This book will be of great interest to scholars on international law the law of armed conflict security studies and IR in general

Convention on International Civil Aviation Ruwantissa Abeyratne, 2013-08-04

This book is both a repertory guide to the Convention on International Civil Aviation (Chicago Convention) as well as a legal analysis of the provisions of the treaty. It traces action taken by the ICAO Assembly and the Council in the implementation of the Convention from the first ICAO Assembly in 1947 until 2012. Above all, the book offers a commentary on the functional and moral fabric of the Chicago Convention, which is not only a multilateral legal instrument that sets out basic principles of air navigation and air transport but also serves as a moral compass that brings the people of the world together. The teleological nature of the Chicago Convention is reflected from the outset from its Preamble, which sets the tone and philosophy of the Convention: that aviation builds friendship and understanding among all people to its technical provisions.

that range from rules of the air to landing at airports and customs and immigration procedures The book effectively demonstrates the Aristotelian principle that rules make people good by forming habits in them Standardization or in other words compliance is the driver of the Convention that keeps aviation safe regular efficient and economical To that end this book traces and details the sustained relevance of the Chicago Convention and the efforts of ICAO and the international aviation community towards keeping air transport on track and ready for its future exponential growth both in letter and in spirit

Palestine and Israel John B. Quigley, 1990 The dispute over Palestine between the

Palestinian Arabs and the Israelis is one of the most volatile and intractable conflicts in the world today. Palestine and Israel examines the history of this battle from the perspective of international law and it argues that a long term solution to the conflict must protect legitimate interests to remain viable, an element the author believes has so far been seriously neglected. This extensively documented work details the complex politics and agonizing struggles that have characterized the clash between Jews and Arabs, examining in depth the competing claims to Palestine and the extent to which legitimate interests remain to be fulfilled. Beginning with the early Zionist settlement in Palestine that rose from the effort by Jews to escape long standing discrimination in Europe, Qigley investigates the origins of the dispute including the British occupation of Palestine, the British Mandate and the involvement of the United Nations. He examines the 1948 War, the establishment of Israel and explores the legal and political status of Jews there. After a detailed analysis of the 1967 War and Israel's occupation of the West Bank and Gaza Strip, he concludes with recommendations for resolving the conflict, including discussions of the responsibility of other states for the persisting injustice, the role of other states in settling the dispute and steps to a possible solution.

The Weaknesses in the International Protection of Minority Rights Javaid Rehman, 2021-10-05. The issue of minority rights continues to occupy a sensitive position in international law. Historical as well as contemporary events show that the subject is also capable of engulfing the international community as a whole. The contention of the present study is that international law is in itself a difficult medium for providing adequate rights for minorities and for effectively safeguarding those rights. This volume analyses the weaknesses in the international protection of minority rights through a detailed examination of the practices and policies of Pakistan. Thought provoking and original in its approach, this volume will prove to be of enormous value to international human rights lawyers and to scholars engaged in the study of minority rights in South Asia and Pakistan.

Essays in Honour of Wang Tieya Ronald St. John Macdonald, 2024-12-09. *Attribution in International Law and Arbitration* Carlo de Stefano, 2020-01-09. Attribution in International Law and Arbitration clarifies and critically discusses the international rules of attribution of conduct, particularly regarding their application to states under international investment law. It examines the key question of how and to what extent breaches of State obligations, particularly in respect of States' commitments to foreign investors under international investment agreements (IIAs) and bilateral investment treaties (BITs), can be attributed. Of special interest within this context is the responsibility of States when the alleged breach has been committed by separate legal entities rather than the state itself. Under domestic law, entities such as state owned enterprises (SOEs) are considered legally distinct; however, the State may still be considered responsible for their actions under international law. The book addresses the relevant issues systematically, beginning with direct reference to the Draft Articles on Responsibility of States for Internationally Wrongful Acts (ARSIWA) on attribution finalized by the International Law Commission (ILC) in 2001. It then elaborates on the specifics of international investment law based on a detailed examination of practice and case law, whilst giving due consideration to the academic debate. The result is a full

innovative take on one of the most difficult questions in investment arbitration
