*The Geospatial Web* Arno Scharl, Klaus Tochtermann, 2009-02-28 The most important attribute of geospatial platforms is their unique potential to aggregate a multitude of public and private geographic data sets providing access to data from government agencies industry and the general public NASA and other organizations have a wealth of planetary science data representing the output from thousands of satellites in earth orbit and from dozens of costly missions to other planets Benefits derived from both the data and visual interfaces to access the data represent a significant return on investment for the public Integrating geospatial data with semantic and collaborative Web technology multiplies the public benefits and represents the main focus of this book The user interfaces of geobrowsers are designed for the layperson giving convenient access to all kinds of geographically referenced information Geobrowsers hide the technical details related to finding accessing and retrieving such information The daunting challenge of the Geospatial Web is to seamlessly integrate and display vastly different information modes Nowadays it is not enough to simply display a map of some region additional dynamic information modes need to be displayed and put into context from weather sensor readings and live aerial video feeds to daily news updates photo collections and video archives Innovative Software Development in GIS Benedicte Bucher, Florence Le Ber, 2013-05-21 At a time when people use more and more geographic information and tools the management of geographical information in software systems still holds many challenges and motivates researchers from different backgrounds to propose innovative solutions Representing geographical space beyond our mere perception is key to making relevant decisions whether it is with respect to sustainable development or to the planning of everyday activities Designing sharing and exploiting such representations entails many challenges This book presents recent software design projects led in teams which sometimes have different backgrounds to address these challenges It analyzes the specificities of these projects in terms of motivation data models and analysis methods Proposals are also put forward to improve resource sharing in this domain **Spatial Data on Water** Hassane Jarar Oulidi, 2018-11-24 Spatial Data on Water Geospatial Technologies and Data Management focuses on the worldwide corroborated difficulties in accessing data a major hindrance in conducting water related studies in several domains Presents examples of research focused on water resource management Includes a guide on how to manage water data using a geographic information system and a spatial data infrastructure Provides several ideas and techniques to support integrated water data management , *100 Years of Electrical Imaging* Hervé Chauris, Andy Adler, William Lionheart, 2012 **Risk, Reliability and Safety: Innovating Theory and Practice** Lesley Walls, Matthew Revie, Tim Bedford, 2016-11-25 The safe and reliable performance of many systems with which we interact daily has been achieved through the analysis and management of risk From complex infrastructures to

consumer durables from engineering systems and technologies used in transportation health energy chemical oil gas aerospace maritime defence and other sectors the management of risk during design manufacture operation and decommissioning is vital Methods and models to support risk informed decision making are well established but are continually challenged by technology innovations increasing interdependencies and changes in societal expectations Risk Reliability and Safety contains papers describing innovations in theory and practice contributed to the scientific programme of the European Safety and Reliability conference ESREL 2016 held at the University of Strathclyde in Glasgow Scotland 25 29 September 2016 Authors include scientists academics practitioners regulators and other key individuals with expertise and experience relevant to specific areas Papers include domain specific applications as well as general modelling methods Papers cover evaluation of contemporary solutions exploration of future challenges and exposition of concepts methods and processes Topics include human factors occupational health and safety dynamic and systems reliability modelling maintenance optimisation uncertainty analysis resilience assessment risk and crisis management

**La Caraïbe, données environnementales**, 2006 A l'interface des continents nord et sud américains la Caraïbe se caractérise par de grandes disparités sociales et biologiques A la pluralité des environnements physiques correspond une diversité floristique faunistique cosystémique et paysagère Ressource primordiale pour les Amérindiens les cosystèmes terrestres et marins sont aujourd'hui l'intersection d'interactions diverses relevant de l'économique et du culturel ou encore de l'aménagement territorial Les spécificités écologiques qui sont fonction des différentes terres caribennes sont la base d'usages nouveaux susceptibles de participer au développement économique par exemple le tourisme A cette histoire singulière faonnée par l'action des hommes s'ajoutent les inconvénients naturels telluriques et atmosphériques dont les effets directs et indirects ont rig certaines composantes de cette partie de la biosphère en terre risquées Les nuisances de toutes sortes inhérentes au fonctionnement de ces sociétés sont des freins au développement mais ou soutenable Pour l'essentiel les économies relèvent des propriétés du mal développement et peuvent entraîner dans des cas extrêmes un chaos politique et social Les conséquences pour les milieux biophysiques sont souvent graves et s'apparentent un coccide Haïti par exemple Le but premier de ce numéro de Terres d'Amérique est d'explorer les différentes facettes du fonctionnement des sociétés caribennes ainsi que leurs dynamiques d'interface au regard des environnements physiques et biologiques

Gaillard, 2016-08-29 The goal of this book is to explore disaster risk reduction DRR migration climate change adaptation CCA and sustainable development linkages from a number of different geographical social and natural science angles Well known scientists and practitioners present different perspectives regarding these inter linkages from around the world with theoretical discussions as well as field observations This publication contributes in particular to the discussion on the Sendai Framework for Disaster Risk Reduction SFDRR 2015 2030 and the debate about how to improve DRR including CCA policies

and practices taking into account migration processes from a large perspective where both natural and social factors are crucial and mutually alloyed Some authors see the SFDRR as a positive step forward in terms of embracing a multitude of issues others doubting that the agreement will lead to much concrete action toward real action on the ground This book is a timely contribution for researchers students and policy makers in the fields of environment human geography migration disaster and climate change studies who seek a more comprehensive grasp of contemporary development issues **Tout le DSCG 5 - Management des systèmes d'information** Jean-François Soutenain, Alain Burlaud, 2020-02-26 Tout le DSCG 5 l'ouvrage de révision et d'entraînement indispensable pour réussir l'épreuve complexe de Management des systèmes d'information des fiches méthodologiques pour une révision efficace du cours de très nombreux exercices et un entraînement à l'épreuve pour tenir prêt le jour J Il couvre tous les grands thèmes du programme 1 Gouvernance des systèmes d'informations 2 La gestion de projets de système d'information 3 Les progiciels de gestion intégrés 4 Gestion de la performance informatique 5 Sécurité des systèmes informatiques 6 L'auditeur en environnement informatique A utiliser en complément du manuel de cours DSCG 5 Management des systèmes d'information Manuel et applications Risques et catastrophes André Dauphiné, Damien Provitolo, 2013-08-07 Les termes risque et catastrophe désignent une potentialité et une réalité qui ne se recouvrent pas Le risque persistant et tendu dans l'espace se différencie de la catastrophe souvent brève et de formes irrégulières Cet ouvrage entièrement revu vient faire le point sur ces notions complexes La première partie Observer insiste sur les concepts et les nouvelles approches Elle présente la résilience comme un nouveau mode de gestion des risques et efface les distinctions qui séparent le domaine physique du champ social Elle est galement consacrée aux représentations et perceptions des risques et catastrophes Dans la deuxième partie Spatialiser les risques et les catastrophes sont examinés différemment selon les zones et les aires de civilisation des milieux littoraux et montagnards et plus encore des villes La troisième partie Comprendre propose des analyses comparatives variées qui permettent de rapprocher des risques perçus comme différents Puis les nouvelles théories générales de la complexité sont invoquées pour comprendre des catastrophes aussi différentes que les séismes les inondations ou les violences urbaines Ces comparaisons sont enfin privilégiées dans la quatrième partie Gérer qui analyse les politiques de gestion lors des phases de prévision de prévention de secours puis de reconstruction en intégrant les mesures les plus récentes au niveau français et européen En conclusion des actions sont proposées pour améliorer le dispositif de lutte contre les catastrophes en France **Les catastrophes naturelles aux Antilles**, 1999-01-01 Une vingtaine d'années séparent la mémorable catastrophe de la Soufrière de Guadeloupe du récent désastre causé par la Soufrière Hill de la voisine de Montserrat quelques encablures au nord De fait ruptures volcaniques séismes et ouragans rythment le temps de la Caraïbe insulaire depuis l'époque de la Découverte De ces phénomènes naturels dévastateurs la mémoire collective a retenu trois manifestations particulièrement tragiques le tremblement de terre de 1843 l'explosion de la Montagne Pelée en 1902 le cyclone de 1928 **Geographical Data Imperfection 2** François Pinet, Mireille Batton-Hubert, Eric

Desjardin, 2024-03-19 Geographical data often contains imperfections associated with insufficient precision errors or incompleteness. If these imperfections are not identified, taken into account and controlled when using the data, the potential for errors may arise leading to significant consequences with unforeseeable effects particularly in a decisionmaking context. It is then necessary to characterize and model this imperfection and take it into account throughout the process. In the previous volume we introduced different approaches for defining, representing and processing imperfections in geographic data. Volume 2 will now present a number of concrete applications in a variety of fields demonstrating the practical application of the methodology to use cases such as agriculture, natural disaster management, mountain hazards, land management and assistance for the visually impaired.
