The book covers a wide range of CNS disorders including epilepsy, Parkinson's, Alzheimer's, Huntington's, multiple sclerosis, schizophrenia, cerebral palsy, autism, ALS, and others. The book begins by presenting the foundations of drug delivery to the brain and addressing the associated challenges. It then delves into clinical trials and explores the future potential of the presented technologies. This reference is designed for drug delivery researchers in academia and corporations, providing them with the essential knowledge about overcoming the Brain Blood Barrier and achieving targeted drug delivery to the central nervous system. Consolidates current state of the art research into a single book volume. Presents the challenges of drug delivery to the CNS in a comprehensive way. Covers the most relevant CNS conditions and diseases. Provides future perspectives and the most active research areas in this fast moving field.

*Physical Therapy for Children With Cerebral Palsy* Mary Rahlin, 2024-06-01

Cerebral palsy is the most common movement disorder encountered in pediatric physical therapy practice. *Physical Therapy for Children With Cerebral Palsy: An Evidence Based Approach* is a unique comprehensive reference that focuses on physical therapy management of children with cerebral palsy through the analysis and synthesis of published research, and it offers evidence-based teaching and learning opportunities to a wide reading audience. Inside, Dr. Mary Rahlin examines the current approach to the diagnosis and classification of cerebral palsy and explores the research evidence related to prognosis, medical management, and physical therapy examination, evaluation, and intervention for children with this condition. *Physical Therapy for Children With Cerebral Palsy* analyzes cerebral palsy as a lifespan condition and utilizes the framework of International Classification of Functioning, Disability, and Health (ICF). Sections include: Typical and atypical development of movement and postural control; Cerebral palsy as a development disorder; Medical management of alterations of body structures and functions by body systems; Physical therapy management including theoretical foundation, research evidence, and practice; Normal and abnormal gait patterns and current evidence for orthotic management and assistive technology; Transition to adult life; Unique topics discussed: Variability, complexity, and adaptability in motor development; The interdisciplinary team and effective interprofessional collaboration; Assessment and management of therapy-related behavior; Complementary and alternative interventions; Segmental kinematic approach to orthotic management via ankle-foot orthosis/footwear combination. Other unique features include Questions to Ponder and Suggested Questions for Future Research at the end of each chapter. These are intended to generate healthy professional debate on a variety of topics both in the classroom and in the clinic.
