Systems Science and World Order Ervin Laszlo, 1983 Research on Project, Programme and Portfolio Management Ronggui Ding, Reinhard Wagner, Constanta-Nicoleta Bodea, 2022-01-24 This volume brings together selected and extended papers representative of work presented at the 8th IPMA Research Conference which was held online between 9th and 11th September 2020 It explores the topics of project programme and portfolio management and self organizing in and through projects Offering international and multidisciplinary perspectives this book answers questions such as What is the impact of self organization on organizational structures processes cultures and leadership How can we define the transformative power of self organization What is the motivation of individuals to perform activities to engage with others and organizations in order to get things done Which kinds of leadership best support self organizing in projects What have disciplines like natural science psychology philosophy sociology and management to offer in this respect What are the cultural limitations and potentials regarding self organization in projects and how do we deal with them Research on Project Programme and Portfolio Management is a valuable resource for all researchers and project management professionals interested in autonomous working and self organizing Science of Goal Formulation Stuart A. Umpleby, 1990-12-01 This work contains the proceedings of a meeting held by 18 American and Soviet scholars on the state of cybernetics and systems theory in their two countries American interest focused on the observation of systems whilst Soviet interest focused on mathematical modelling Vision 2020 Ervin Laszlo, 2005-08-08 This revised edition of the classic text of the period provides both the student and the specialist with an informative account of post Roman English society **Rethinking the Process of Operational Research & Systems Analysis** R. Tomlinson, I. Kiss, 2013-10-22 Invited contributions from distinguished practitioners and methodologists of operational research and applied systems analysis which represent a true state of the art and which provide perhaps for the first time a coherent interlocking set of ideas which may be considered the foundations of the subject as a science in its own right **The Cumulative Book Index** , 1983 A world list of books in the English language Future Survey Annual 1987 Michael Marien, 1988-01-01 Scientific and Technical Books and Serials in Print , 1984 Future Survey Annual 1983 Michael Marien, 1984-01-01 **British Book News** , 1983 American Book Publishing Record , 1983-04 The Publishers' Trade List Annual , 1985 Books in Series , 1985 Vols for 1980 issued in three parts Series Authors and Titles **Racism, Diplomacy, and International Relations** Ko Unoki, 2022-02-21 Unoki addresses the significance of racism in international relations by focusing on its conception as a doctrine and its interrelationship with imperialism its doctrinal role in the development of the discipline of International Relations IR and various episodes from Western and Asian history in which racism had affected state behavior and the practice of diplomacy The creation of empires that oppressed indigenous peoples the two World Wars and the campaigns of ethnic cleansing and genocide that accompanied these wars and other conflicts and international movements calling for the elimination of racial

discrimination attest to the impact racial prejudice or racism has had on international relations Despite this history racism s relevance is seldom mentioned in IR courses offered in universities or IR textbooks Instead IR scholars have often explained the behavior of states using the framework of theories that highlight variables and themes such as power fear and the search for security in an anarchic world Unoki demonstrates that racism has not only substantially influenced the course of international relations but that it continues to do so in the 21st century making it imperative that policymakers are aware of racism s deleterious legacy A vital resource for students policymakers and those who are interested in building a more tolerant and just world *Interdisciplinary Research in Technology and Management* Satyajit Chakrabarti,Rintu Nath,Pradipta Kumar Banerji,Sujit Datta,Sanghamitra Poddar,Malay Gangopadhyaya,2021-09-14 The conference on Interdisciplinary Research in Technology and Management was a bold experiment in deviating from the traditional approach of conferences which focus on a specific topic or theme By attempting to bring diverse inter related topics on a common platform the conference has sought to answer a long felt need and give a fillip to interdisciplinary research not only within the technology domain but across domains in the management field as well The spectrum of topics covered in the research papers is too wide to be singled out for specific mention but it is noteworthy that these papers addressed many important and relevant concerns of the day *The Cybernetic Laws of Social Progress* Arvid Aulin,1982 Depicts the development of societal organization welfare political freedom as a gradual process of increased self steering with man as a self steering actor thereby rejecting the man machine analogy **Library of Congress Subject Headings** Library of Congress,Library of Congress. Office for Subject Cataloging Policy,2010 **Comprehending the Complexity of Countries** Hans Kuijper,2022-01-18 This book argues for computer aided collaborative country research based on the science of complex and dynamic systems It provides an in depth discussion of systems and computer science concluding that proper understanding of a country is only possible if a genuinely interdisciplinary and truly international approach is taken one that is based on complexity science and supported by computer science Country studies should be carefully designed and collaboratively carried out and a new generation of country students should pay more attention to the fast growing potential of digitized and electronically connected libraries In this frenzied age of globalization foreign policy makers may to the benefit of a better world profit from the radically new country studies pleaded for in the book Its author emphasizes that reductionism and holism are not antagonistic but complementary arguing that parts are always parts of a whole and a whole has always parts
