Thierauf,James J. Hoctor,2002-12-30 One of the first books to probe the latest direction in computing technology Thierauf s and Hoctor s innovative text explores ways in which smart business systems can help pick the best most optimal or near optimal solutions from among hundreds even thousands of possibilities that threaten to swamp organizational decision makers daily Authors make clear that while past information systems have focused on generating information that is helpful in the production of knowledge over time smart business systems utilizing optimizing techniques can do it quickly more efficiently and in ways that can raise organizations to higher levels of competitiveness Well illustrated with examples and discussions of typical applications in such areas as strategic planning marketing manufacturing and accounting the book will help managers at all levels tie their organization s critical success factors into its key performance indicators and financial ratios The result is a win win situation within your company s complex of competing needs and goals and a way to produce directly and immediately measurable benefits on the bottom line The book is designed for company managers and other decision makers and for information systems professionals It provides understanding of one of the most important developments in systems decision making and how these smart business systems are constructed It is also suitable in an academic environment specifically in undergraduate and graduate courses that cover the fundamentals of smart business systems and which give special emphasis to optimization models The authors explain that enterprise resource planning and supply chain management vendors include optimization algorithms in their products and that their book will make software optimization more accessible to developers of business systems Although optimization is undoubtedly a complicated subject Thierauf and Hoctor go a long way toward simplifying it In doing so they enhance its value as an important tool for decision makers in almost all organizational capacities   *Artificial Intelligence in Real-Time Control 1992* M.G. Rodd,H.B. Verbruggen,2014-06-28 The symposium had two main aims to investigate the state of the art in the application of artificial intelligence techniques in real time control and to bring together control system specialists artificial intelligence specialists and end users Many professional engineers working in industry feel that the gap between theory and practice in applying

control and systems theory is widening despite efforts to develop control algorithms Papers presented at the meeting ranged from the theoretical aspects to the practical applications of artificial intelligence in real time control Themes were the methodology of artificial intelligence techniques in control engineering the application of artificial intelligence techniques in different areas of control and hardware and software requirements This symposium showed that there exist alternative possibilities for control based on artificial intelligence techniques   Computerworld ,1978-02-06 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network   **Computerworld** ,1979-03-26 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network   **NBS Special Publication** ,1968   **Computer Literature Bibliography: 1964-1967** W.
