present and future the challenge of starting a playwork section in a local authority and the value of networking Contributors explore the essence of play the historical roots of playwork and the role of play cues in human and animal behaviour There is an exploration of the astounding impact of a therapeutic playwork project on the development of a group of abandoned children in Romania The final chapter reinforces the need for playworkers to be reflective practitioners in all aspects of their work

Mapping Environmental Sustainability Oreszczyn, Sue, Lane, Andy, 2017-09-06 While there is growing interest in participatory research to address issues around environmental sustainability the focus of analysis tends to be on the results or products of the research rather than the processes involved Addressing this gap the authors draw on their experience of specific mapping techniques based on different systemic concepts and theories that have helped facilitate explore and capture different understandings of the relationships perspectives and boundaries within situations involving environmental sustainability The development of visual mapping techniques is explained and practical case studies describe their application in environmental sustainability projects from working with farmers and their networks to using visual mapping with indigenous communities and managing coastal environments Each case study provides a real world project example from researchers with extensive experience of using these techniques to research different aspects of environmental sustainability over several decades
