*T. Thomas Fortune* Emma Lou Thornbrough, 1972      *Black Leaders of the Twentieth Century* John Hope Franklin, August Meier, 1982 Biographical studies of fifteen twentieth century black leaders      *Americans in Dissent* Steven L. Piott, 2014-10-15 *Americans in Dissent* is designed as a collection of biographical essays written for general readers and undergraduates that focuses on the topic of American dissent during the period from 1830 to 1890 Centered on influential nineteenth century social critics this volume shifts the focus of American reform away from romantic attempts at reforming the individual to more pragmatic efforts aimed at confronting social economic and political problems Coexisting with what seemed to be a preponderance of romantic idealism during much of the period was an undercurrent of genuine realism Instead of looking through the prism of a pre modern society many of these dissenters focused on how society was becoming increasingly acquisitive and entrepreneurial They were among the first to question laissez faire individualism and unrestrained industrial capitalism and anticipated the critiques of later Progressive Era reformers Representing a wide range of interests each of the selections features a fascinating and provocative man or woman who offered a fundamental critique of American society and made a significant contribution to the development of the reform ethos that characterized the period

**Remembering Reconstruction** Carole Emberton, Bruce E. Baker, 2017-04-12 Academic studies of the Civil War and historical memory abound ensuring a deeper understanding of how the war's meaning has shifted over time and the implications of those changes for concepts of race citizenship and nationhood The Reconstruction era by contrast has yet to receive similar attention from scholars *Remembering Reconstruction* ably fills this void assembling a prestigious lineup of Reconstruction historians to examine the competing social and historical memories of this pivotal and violent period in American history Many consider the period from 1863 beginning with slave emancipation to 1877 when the last federal troops were withdrawn from South Carolina and Louisiana an unfinished revolution for civil rights racial identity formation and social reform Despite the cataclysmic aftermath of the war the memory of Reconstruction in American consciousness and its impact on the country's fraught history of identity race and reparation has been largely neglected The essays in *Remembering Reconstruction* advance and broaden our perceptions of the complex revisions in the nation's collective memory Notably the authors uncover the impetus behind the creation of black counter memories of Reconstruction and the narrative of the tragic era that dominated white memory of the period Furthermore by questioning how Americans have remembered Reconstruction and how those memories have shaped the nation's social and political history throughout the twentieth century this volume places memory at the heart of historical inquiry      **Beyond the Rope** Karlos K. Hill, 2016-07-11 This book tells the story of African Americans evolving attitudes towards lynching from the 1880s to the present Unlike most histories of lynching it explains how African Americans were both purveyors and victims of lynch mob violence and how this dynamic has shaped the meaning of lynching in black culture      *African American Literature in*

*Transition, 1900-1910: Volume 7* Shirley Moody-Turner, 2021-05-13 African American Literature in Transition 1900 1910 offers a wide ranging multi disciplinary approach to early twentieth century African American literature and culture It showcases the literary and cultural productions that took shape in the critical years after Reconstruction but before the Harlem Renaissance the period known as the nadir of African American history It undercovers the dynamic work being done by Black authors painters photographers poets editors boxers and entertainers to shape New Negro identities and to chart a new path for a new century The book is structured into four key areas Black publishing and print culture innovations in genre and form the race class and gender politics of literary and cultural production and new geographies of Black literary history These overarching themes along with the introduction of established figures and movement alongside lesser known texts and original research offer a radical re conceptualization of this critical but understudied period in African American literary history

The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater

number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
