Mathematical Tables A. A. Abramov,2014-05-09 Mathematical Tables of  $\ln z$  for Complex Argument is a compilation of tables of  $\ln z$   $z = x + iy$  calculated for steps in  $x$  and  $y$  of 0.01 and with an accuracy of one unit in the last the sixth decimal place Interpolation is used to calculate  $\ln z$  for intermediate values and is carried out separately for the real and imaginary parts of  $\ln z$  Six places are retained in interpolation This book first explains how the values of  $\ln z$  are calculated using the asymptotic formula in a wide lattice with step  $h = 0.16$  and how the tables and the nomograph are used The values in the lattice are interpolated successively at the centers of various symmetric figures The calculation of  $\ln z$  outside the quadrangle is also considered Formulas for the calculation of  $\ln z$  outside the given rectangle are listed The nomograph is intended to facilitate the interpolation procedure Some of the calculations including the rounding off of the results to the sixth place and the calculation of second differences are carried out with the aid of analytical computers This monograph will be of interest to mathematicians and mathematics students      **The Thermodynamics of Electrical Phenomena in Metals, and A Condensed Collection of Thermodynamic Formulas** Percy Williams Bridgman,1961
