Constructed Wetlands in Water Pollution Control P. F. Cooper, B. C. Findlater, 2013-10-22 *Constructed Wetlands in Water Pollution Control* documents the proceedings of the International Conference on the Use of Constructed Wetlands in Water Pollution Control held in Cambridge UK 24-28 September 1990. This volume contains 70 papers that are organized into 12 parts. Part 1 includes papers such as the need for hydrophyte based systems in the treatment of waste water from small communities and soil oxygenation in constructed reed beds. Part 2 contains studies on nitrogen and phosphorus removal. The papers in Part 3 are devoted to sewage treatment while Part 4 deals with sludge treatment. Part 5 presents case studies on wetlands wastewater and reed bed treatment systems. Part 6 focuses on agricultural waste treatment. Part 7 contains papers on wetland and waste treatment for small populations. Part 8 covers industrial waste treatment while Parts 9 and 10 deal with mining waste treatment. Part 11 takes up the design of treatment systems. Part 12 contains 20 poster papers. Effects of Waste-disposal Practices on Ground-water Quality at Five Poultry (broiler) Farms in North-central Florida, 1992-93 Hilda H. Hatzell, 1995 **Moralizing The Environment** Philip Lowe, Judy Clark, Susanne Seymour, Neil Ward, 2023-03-24. First published in 1997. There was a time when pollution was equated with the urban and the industrial. But things have changed. What were previously mutually exclusive categories of agriculture and pollution have been brought together in a new morally charged atmosphere. *Moralizing the environment* is a study of how this shift came about. It examines the emergence of the farm pollution problem in Britain in the 1980s. It draws upon a study of the regulation of farm wastes: cattle slurry, silage effluent and the dirty water from farmyards conducted between 1989 and 1995. Detailed surveys and ethnographic fieldwork were carried out in the south west of England among dairy farmers, pollution inspectors, agricultural advisers and environmentalists. In trying to get to grips with farm pollution they were pursuing different notions, not only of sound agricultural practice but also of nature morality and the law. What ultimately was at stake was who could be trusted to safeguard the countryside. *A Reappraisal of the Urban Planning Process* Alexander Clement Mosha, 1995

Water-resources Investigations Report, 1995 *Animal Wastes* Janet E. Dombrowski, 1991 **Reconnaissance of Water Quality at Nine Dairy Farms in North Florida, 1990-91** William J. Andrews, 1992 **CAP and the Rural Environment in Transition** Floor Brouwer, Philip Lowe, 1998-09-01. In recent years policy makers have had to respond to criticisms of the environmentally damaging role of the Common Agricultural Policy (CAP). The 1992 reform of the CAP partly addressed the criticisms by reducing the incentives to intensify production and by promoting the beneficial effects of agriculture on landscape and biodiversity. In assessing the consequences of these changes it is important to bear in mind the variability of agricultural production systems and of environmental conditions in different EU Member States. Uniform responses or single environmental outcomes from a change in agricultural policy are unlikely. The book therefore addresses

addresses the environmental effects of agricultural policy reform from the different national perspectives In providing an overview of the role of the CAP in the rural environment in transition it explores key linkages between agricultural policy and the physical environment landscape and biodiversity The book is aimed at policy makers and researchers in the fields of agricultural and environmental economics and rural geography interested in the linkages between agricultural policy and the environment
