Tactical Display for Soldiers National Research Council, Division of Behavioral and Social Sciences and Education, Board on Human-Systems Integration, Panel on Human Factors in the Design of Tactical Display Systems for the Individual Soldier, 1997-01-17 This book examines the human factors issues associated with the development testing and implementation of helmet mounted display technology in the 21st Century Land Warrior System Because the framework of analysis is soldier performance with the system in the full range of environments and missions the book discusses both the military context and the characteristics of the infantry soldiers who will use the system The major issues covered include the positive and negative effects of such a display on the local and global situation awareness of the individual soldier an analysis of the visual and psychomotor factors associated with each design feature design considerations for auditory displays and physical sources of stress and the implications of the display for affecting the soldier s workload The book proposes an innovative approach to research and testing based on a three stage strategy that begins in the laboratory moves to controlled field studies and culminates in operational testing

Interfaces for Ground and Air Military Robots National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Human Factors, Planning Committee for the Workshop on Scalable Interfaces for Air and Ground Military Robots, 2005-03-21 In the early years of robotics and automated vehicles the fight was against nature and not against a manifestly intelligent opponent In military environments however where prediction and anticipation are complicated by the existence of an intelligent adversary it is essential to retain human operators in the control loop Future combat systems will require operators to control and monitor aerial and ground robotic systems and to act as part of larger teams coordinating diverse robotic systems over multiple echelons The National Research Council organized a workshop to identify the most important human related research and design issues from both the engineering and human factors perspectives and develop a list of fruitful research directions Interfaces for Ground and Air Military Robots summarizes the presentations and discussions from this workshop

Assessing Fitness for Military Enlistment National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Youth Population and Military Recruitment: Physical, Medical, and Mental Health Standards, 2006-02-27 The U S Department of Defense DoD faces short term and long term challenges in selecting and recruiting an enlisted force to meet personnel requirements associated with diverse and changing missions The DoD has established standards for aptitudes abilities medical conditions and physical fitness to be used in selecting recruits who are most likely to succeed in their jobs and complete the first term of service generally 36 months In 1999 the Committee on the Youth Population and Military Recruitment was established by the National Research Council NRC in response to a request from the DoD One focus of the committee s work was to examine trends in the youth population relative to the needs of the military and the standards used to screen applicants to meet these needs When the committee began its work in 1999 the Army the Navy and the Air Force had recently experienced recruiting shortfalls By the early 2000s all the Services were meeting their goals however in the first half of calendar year 2005 both the Army and the Marine Corps experienced recruiting difficulties and in some months shortfalls When recruiting goals are not being met scientific guidance is needed to inform policy decisions regarding the advisability of lowering standards and the impact of any change on training time and cost job performance attrition and the health of the force *Assessing Fitness for Military Enlistment* examines the current physical medical and mental health standards for military enlistment in light of 1 trends in the physical condition of the youth population 2 medical advances for treating certain conditions as well as knowledge of the typical course of chronic conditions as young people reach adulthood 3 the role of basic training in physical conditioning 4 the physical demands and working conditions of various jobs in today s military services and 5 the measures that are used by the Services to characterize an individual s physical condition The focus is on the enlistment of 18 to 24 year olds and their first term of service *Shepherding UxVs for Human-Swarm Teaming* Hussein A. Abbass, Robert A. Hunjet, 2021-03-19 This book draws inspiration from natural shepherding whereby a farmer utilizes sheepdogs to herd sheep to inspire a scalable and inherently human friendly approach to swarm control The book discusses advanced artificial intelligence AI approaches needed to design smart robotic shepherding agents capable of controlling biological swarms or robotic swarms of unmanned vehicles These smart shepherding agents are described with the techniques applicable to the control of Unmanned X Vehicles UxVs including air unmanned aerial vehicles or UAVs ground unmanned ground vehicles or

UGVs underwater unmanned underwater vehicles or UUVs and on the surface of water unmanned surface vehicles or USVs This book proposes how smart shepherds could be designed and used to guide a swarm of UxVs to achieve a goal while ameliorating typical communication bandwidth issues that arise in the control of multi agent systems The book covers a wide range of topics ranging from the design of deep reinforcement learning models for shepherding a swarm transparency in swarm guidance and ontology guided learning to the design of smart swarm guidance methods for shepherding with UGVs and UAVs The book extends the discussion to human swarm teaming by looking into the real time analysis of human data during human swarm interaction the concept of trust for human swarm teaming and the design of activity recognition systems for shepherding Presents a comprehensive look at human swarm teaming Tackles artificial intelligence techniques for swarm guidance Provides artificial intelligence techniques for real time human performance analysis **Human Performance, Situation Awareness, and Automation** Dennis A. Vincenzi, Mustapha Mouloua, Peter A. Hancock, 2005-01-06 In 2000 the Conference on Automation joined forces with a partner group on situation awareness SA

The rising complexity of systems demands that one can be aware of a large range of environmental and task based stimulation in order to match what is done with what has to be done Thus SA and automation based interaction fall naturally together and this conference is the second embodiment of this union Moving into the 21st century further diversification of the applications of automation will continue for example the revolution in genetic technology Given the broad nature of this form of human machine interaction it is vital to apply past lessons to map a future for the symbiotic relationship between humans and the artifacts they create It is as part of this ongoing endeavor that the present volume is offered
