Tactics In Womens Singles Doubles And Mixed Doubles:

Tactics in Women's Singles, Doubles, and Mixed Doubles Rex Lardner, 1975 *Sex Integration in Sport and Physical Culture* Alex Channon, Katherine Dashper, Thomas Fletcher, Robert Lake, 2018-10-11 Scholars working in the academic field of sport studies have long debated the relationship between sport and gender. Modern sport forms along with many related activities have been shown to have historically supported ideals of male superiority by largely excluding women and/or celebrating only men's athletic achievements. While the growth of women's sport throughout the 20th and 21st centuries has extinguished the notion of female frailty, revealing that women can embody athletic qualities previously thought exclusive to men, the continuation of sex segregation in many settings has left something of a discursive back door through which ideals of male athletic superiority can escape unscathed, retaining their influence over wider cultural belief systems. However, sex-integrated sport potentially offers a radical departure from such beliefs as it challenges us to reject assumptions of male superiority, entertaining very different visions of sex difference and gender relations to those typically constructed through traditional models of physical culture. This comprehensive collection offers a diverse range of international case studies that reaffirm the contemporary relevance of sex integration debates and also articulate the possibility of sport acting as a legitimate space for political struggle, resistance, and change. This book was originally published as a special issue of *Sport in Society*.

Performance Optimization in Racket Sports: the Influence of Psychological Techniques, Factors, and Strategies, 2nd edition Nicolas Robin, Toru Ishihara, Miguel Crespo, Emma Guillet Descas, 2023-07-21 Research and empirical work have revealed the importance of psychological, mental skills, factors, and strategies in improving athletic performance, especially in racket sports. High levels of self-confidence, commitment, motivation, as well as the ability to imagine, self-regulate, set, and achieve goals, control emotion, stress, and anxiety, facilitate the ability of the racket sport players to achieve peak performance. For example, players and coaches recognize that the mental or psychological factor should be considered and trained in the same way as the technical or physical components. The aim of this Research Topic is to bring together articles in which psychological techniques, factors, or strategies are discussed, used, or tested in order to improve the performance of racket sport players, such as tennis, table tennis, badminton, or squash, and also in new activities such as racketlon, paddle, or beach tennis. Topics of primary interest include, but are not limited to: Mental training for racket sports; The role of mental coach in racket sports; Psychological strategies to improve the performance in racket sports; Relationship between performance and psychological factors; Applied performance enhancement by means of psychological techniques; Measures of psychological variables in racket sport players; Training of psychological skills for performance improvement in racket sport.
