Stories of Vigilant Courage Adam Hildebrand, 2008-08 If you find yourself at the bedside of a child with multiple handicaps and complex medical needs you need to read this book Whether you are a nurse doctor parent or family member health care professional or a personal ally of an individual who is disabled you will benefit from reading the stories in the book and the analysis of issues by the editor It sometimes happens that some people whether a professional or not will be tempted to think of such children as better off dead an extremely dangerous assumption Illness and suffering do not diminish the value of a person s life and no one has the right to decide whether or not a person should live or die This book gives firsthand accounts of the experiences of handicapped children and their families in health care settings Their experiences vary from doctor to doctor nurse to nurse and hospital to hospital The key difference is that some people held a strong belief that every person s life has intrinsic value and that their lives were sacred Yet others measured the value of a life according to external factors such as level of disability impairments and level of suffering whether presumed or real You can guess

which people gave better care and which children lived longer and better accordingly In spite of the difficult challenges that handicapped children and their families face as described in these stories this book is a book of hope You will be inspired by the courageous tenacity of parents who literally stood at the bedside of their children often for months and protected and affirmed the well being of their child This is a book about people who made a difference a difference between life and death

Piggue,2025-04-29 Our bodies are ALIVE is a statement suggesting that we physically and energetically exist as dynamic and active beings Even when unaware our bodies are engaging and mapping all that exists around them and consequently are creating and supporting narratives we would do well to investigate These narratives have the power to lodge within the scripts of our bodies while at the same time continuing to inform our choices and decisions without explicit permission We are so much more than our physical brains because our minds exist throughout the entirety of our bodies they are bodies that can hold knowledge and wisdom from ages past and have the ability to inform themselves Intentional mining of this gold within can significantly inform the impact leaders have on others and the state of their own physical and mental health Any healing and liberative work then begins with self literacy From the disciplines of neuroscience womanist theology psychology and indigenous spirituality conversations with African American clergy women reveal fascinating insights on embodied self relationship pain and healing as well as paths toward more integrated and effective leadership practices It is ultimately an invitation to radical self regard respect of body intelligence and the process of healing FIERCELY Always Here ,
