

# AN INTRODUCTION TO THE HUMAN BODY

Sarah Ulliya  
Dept. DKKD

Selama semenit yang Anda gunakan untuk membaca halaman ini:

Mata Anda akan mengubah gambar dari halaman ini menjadi sinyal kimia (impuls saraf) yang akan menyebarkan informasi ke otak Anda untuk diproses lebih lanjut.

Sekitar 150 juta sel darah merah tua akan mati dan digantikan oleh sel darah merah yang baru.

Jantung anda akan berdetak 75 kali, memompa 5 liter (sekitar 5 quart) darah ke paru-paru dan 5 liter lainnya ke bagian tubuh lain.

Lebih dari 1 liter darah mengalir melalui kedua ginjal anda, yang akan memproses darah untuk menahan bahan yang "dibutuhkan" dan mengeluarkan bahan yang "tidak dibutuhkan" melalui urin. Ginjal anda akan menghasilkan 1 mL urin (sekitar seujung sendok).

Selain menerima dan memproses informasi indrawya masukan dari sistem penglihatan, otak Anda akan mengirim sinyal ke otot untuk mempertahankan postur Anda, menggerakkan bola mata Anda membaca, mengatur suhu tubuh Anda membaca dan membaca halaman jika diperlukan. Sel-sel perantara kimia akan mengangkut sinyal antara saraf dan otot Anda untuk memicu kontraksi otot yang sesuai.

Anda akan menghirup dan mengeluarkan udara sekitar 12 kali, mempertukarkan 8 liter udara antara atmosfer dan paru-paru Anda.

Sel-sel Anda akan mengonsumsi 250 mL (sekitar secangkir) oksigen dan menghasilkan 200 mL karbon dioksida.

Anda akan menggunakan sekitar 2 kalori energi yang berasal dari makanan untuk memompa "beban hidup" tubuh Anda dan otot-otot yang berkontraksi juga akan menghasilkan energi.

A Guide To Dissection Of The Human Body Frederick Peter Lisowski, 1998-12-15 This invaluable manual is intended to guide and facilitate human anatomical dissections It is flexible enough for use in long as well as short courses and is thus structured in such a way that the dissection of the body can be completed in 110 to 160 hours Although some medical schools have reduced the amount of dissection the North American schools have lengthened their courses The manual can also be used in those courses where only part of the body is dissected and even in the study of prosected material It can be particularly useful as a link with real anatomy when used together with computerised anatomy programs many curricula emphasise that the student should go back and forth between the body and computer programs The guide is also useful where students do not dissect but merely look at atlases prosections and models by providing a link to real living and variable anatomy Nowadays many anatomy courses are aimed solely at systems anatomy Although important as systems are regions are clinically vital since many more problems concern damage to several systems because the lesions are regional This is where the guide is of considerable help There is an introduction for each anatomical region and for each section to be

dissected there is an overview a dissection schedule which guides the student through a set of instructions a summary and a list of objectives that are clinically important The terminology used is the latest This manual is suitable for medical dental osteopathy and chiropody schools as well as human biology and science programs that include dissection in their undergraduate gross anatomy course It is also of value for advanced knowledge of anatomy for surgery as required by further qualifications and in relation to specialised training involving interpretation of normal anatomy in non invasive imaging of anatomy for clinical diagnosis practice of clinical surgical skills on cadaveric material and in discussions about clinical problems

**A Cultural History of the Human Body in the Medieval Age** Linda Kalof,2012-03-01 The Christian Jewish and Muslim communities of medieval Western Europe conceived of the human body in manifold ways The body was not a fixed or unmalleable mass of flesh but an entity that changed its character depending on its age its interactions with its environment and its diet For example a slave would have been marked by her language her name her religion or even by a sign burned onto her skin not by her color alone Covering the period from 500 to 1500 and using sources that range across the full spectrum of medieval literary scientific medical and artistic production this volume

explores the rich variety of medieval views of both the real and the metaphorical body A Cultural History of the Human Body in the Medieval Age presents an overview of the period with essays on the centrality of the human body in birth and death health and disease sexuality beauty and concepts of the ideal bodies marked by gender race class and age cultural representations and popular beliefs and the self and society
