The Humanizing Of Knowledge:

The Humanizing of Knowledge James Harvey Robinson, 1926 *The Humanizing of Knowledge* James Harvey Robinson, 1971-01-01 **The Humanizing of Knowledge** James Harvey Robinson, 1923 *The Humanizing of Knowledge* James Harvey Robinson, 1923 *The Pursuit of Knowledge Under Difficulties*, 1995-12 This first history of nontraditional education in America covers the span from Benjamin Franklin's Junto to community colleges. It aims to unravel the knotted connections between education and society by focusing on the voluntary pursuit of knowledge by those who were both older and more likely to be gainfully employed than the school age population *The Seamen's Journal*, 1924 **Modern Scientific Knowledge of Nature, Man, and Society** Frederick Albert Cleveland, 1929 **The Organization of Knowledge and the System of the Sciences** Henry Evelyn Bliss, 1929 **The New Republic** Herbert David Croly, 1925 **Handbook and proceedings of the annual meeting** California Library Association, 1928 *Publications of the Library Association of California*, 1928 **Illinois Schools Journal**, 1924 **The Chicago Schools Journal**, 1925 *Chicago Schools Journal*, 1924 **Migrant Feelings, Migrant Knowledge** Robert Irwin, 2022-11-08 The digital storytelling project Humanizing Deportation invites migrants to present their own stories in the world's largest and most diverse archive of its kind. Since 2017 more than 300 community storytellers have created their own audiovisual testimonial narratives sharing their personal experiences of migration and repatriation. With *Migrant Feelings* *Migrant Knowledge* the project's coordinator Robert Irwin and other team members introduce the project's innovative participatory methodology drawing out key issues regarding the human consequences of contemporary migration control regimes as well as insights from migrants whose world-making endeavors may challenge what we think we know about migration. In recent decades migrants in North America have been treated with unprecedented harshness. *Migrant Feelings* *Migrant Knowledge* outlines this recent history revealing stories both of grave injustice and of seemingly unsurmountable obstacles overcome. As Irwin writes: "The greatest source of expertise on the human consequences of contemporary migration control are the migrants who have experienced them and their voices in this searing collection jump off the page and into our hearts and minds."

Proceedings, [semi-annual Meeting] California Academy of Social Sciences, 1924 *Imaginative Science Education* Yannis Hadzigeorgiou, 2016-05-26 This book is about imaginative approaches to teaching and learning school science. Its central premise is that science learning should reflect the nature of science and therefore be approached as an imaginative creative activity. As such the book can be seen as an original contribution of ideas relating to imagination and creativity in science education. The approaches discussed in the book are storytelling, the experience of wonder, the development of romantic understanding and creative science including science through visual art, poetry and dramatization. However, given the perennial problem of how to engage students of all ages in science, the notion of aesthetic experience and hence the possibility for students to have more holistic and fulfilling learning experiences through the aforementioned imaginative

approaches is also discussed Each chapter provides an in depth discussion of the theoretical background of a specific imaginative approach e g storytelling wonder full science reviews the existing empirical evidence regarding its role in the learning process and points out its implications for pedagogy and instructional practices Examples from physical science illustrating its implementation in the classroom are also discussed In distinguishing between participation in a science activity and engagement with science ideas per se the book emphasizes the central role of imaginative engagement with science content knowledge and thus the potential of the recommended imaginative approaches to attract students to the world of science
