Newman, 1999 A person intent on creating a new identity will have to come up with

numerous types of paper documents such as birth certificates college transcripts degrees reference letters and the like It is often impossible to obtain real documents in the name of the new identity This leaves the person who wishes to change identities with two options The first option is to purchase false documents from one of the numerous purveyors who advertise in the national tabloids and magazines The first problem with purchasing documents via this route is that the quality of these documents is always in doubt The second problem is that many of these businesses operate outside the law controlling the manufacture and sale of false documents These sellers can be raided by the police or FBI at any time Even worse the mail these businesses receive may be subjected to what is known as a mail cover During a mail cover the name and return address of all incoming mail is recorded Those people attempting to order from the business would wind up with their name in an investigator s database and they might face a visit from the police at a later time The second option is creating their own People wanting to establish a new identity need to become adept at the skill of document forgery in the early stages of their identity creation These forged documents will allow the identity seeker to obtain real genuine identity documents from government agencies and other places A false birth certificate will allow the acquisition of a valid drivers license from a state motor vehicle department A false transcript can be used to register for classes at a university and maybe even obtain a scholarship A fake employment reference letter can be used to obtain a good job in the new identity A proficiency in document forgery allows the seeker of a new identity to create the foundation of his alternate self at home without drawing the attention of curious busybodies Forgery is easily learned by most people and the more a forger practices the better are the documents that can be produced Eventually the diligent forger will be able to turn out documents that only a skilled document examiner could prove to be fakes and then only after an extensive examination Good quality forgeries are almost never detected by people who commonly examine identification documents The I D Forger covers in step by step detail all of the classic and modern high tech methods of forging the most commonly used identification documents Chapters include The uses of homemade documents Old Fashioned forgery Computer forgery Birth certificate basics Old Fashioned birth certificate forgery Computer forgery of birth certificates Drivers license and identification card forgery Social Security cards Other miscellaneous document forgery Safe uses of forged identification And more The I D Forger is must reading for anyone interested in identification and false identification sold for informational purposes only *U{u00A8}berhacker!* Carolyn P.
