**Of Greater Dignity than Riches** Farhan Karim, 2019-03-07 Extreme poverty which intensified in India during colonial rule peaked in the 1920s after decades of imperialist exploitation famine and disease a time when architects engineers and city authorities proposed a new type of housing for India's urban poor and industrial workers As Farhan Karim argues economic scarcity became a central

inspiration for architectural modernism in the subcontinent As India moved from colonial rule to independence the Indian government business entities international NGOs and intergovernmental agencies took major initiatives to modernize housing conditions and the domestic environment of the state s low income population Of Greater Dignity than Riches traces multiple international origins of austerity as an essential ingredient of postcolonial development By prescribing model villages communities and ideal houses for the working class this project of austerity eventually reduced poverty into a stylized architectural representation In this rich and original study Karim explains the postwar and postcolonial history of low cost housing as an intertwined process of global transferences of knowledge Cold War cultural politics postcolonial nationalism and the politics of economic development      *Southern Homes and Plan Books* Sarah J. Bowdin, 2010 Exploring the concepts involved in planning events this study is designed to develop an understanding of the key issues which include management logistics staging marketing promotion and post event evaluation      **The Ideal House: a Series of Designs for Ideal Homes** W. Rupert Davison, 1910      **Annual Report** Iowa State Horticultural Society, Des Moines, 1893      **Home** Alison Blunt, Robyn Dowling, 2022-05-30 *Home* articulates a critical geography of home in which home is understood as an emotive place and spatial imaginary that encompasses lived experiences of everyday domestic life alongside a wider and often contested sense of being and belonging in the world Engaging with the burgeoning cross disciplinary interest in home since the first edition was published this significantly revised and updated second edition contains new research boxes illustrations and contemporary examples throughout It also adds a new chapter on Home and the City that extends the scalar understanding of home to the urban The book develops the conceptual and methodological

underpinnings of a critical geography of home drawing on key feminist postcolonial and housing thinkers as well as contemporary methodological currents in non representational thinking and performance The book s chapters consider the making and unmaking of home across the domestic scale house as home the urban city as home national nation as home and homemaking in relation to transnational migration and diaspora Each chapter includes illustrative examples from diverse geographical contexts and historical time periods Chapters also address some of the key cross cutting dimensions of home across these scales including digital connectivity art and performance more than human constructions of home and violence and dispossession The book ends with a research agenda for home in a world of COVID 19 The book provides an understanding of home that has three intersecting dimensions that material and imaginative geographies of home are closely intertwined that home power and identity are intimately linked and that geographies of home are multi scalar This framework the examples used to illustrate it and the intended audience of academics and students across the humanities and social sciences will together shape the field of home studies into the future
