The Influence of the Carnegie, Ford, and Rockefeller Foundations on American Foreign Policy Edward H. Berman, 1984-06-30 This book examines the generally unrecognized role played by the Carnegie Ford and Rockefeller foundations in support of United States foreign policy particularly since 1945 The foundations efforts on behalf of American interests abroad have focused primarily on their support for a number of institutions of higher education in strategically located Third World nations These institutions modeled after foundation supported American universities were designed to train Third World leaders in norms that would encourage them minimally to assume a posture of neutrality toward American economic and political penetration of their societies Dr Berman's study challenges the oft asserted but undocumented thesis of the American political right that these liberal foundations historically have pursued policies detrimental to United States interests The evidence indicates how foundation policies and programs were formulated after close consultation with leaders of the American corporate sector and government officials and how their activities were designed to further the objectives determined by those who influence the direction of United States foreign policy

Managing Political Change Irene L. Gendzier, 2019-03-04 For nearly three decades policymakers and students have been concerned with Third World societies in transition Conventional interpretations of political change formalized in studies of political development have dominated approaches to analyzing such changes Yet argues the author these interpretations have been justly criticized as bankrupt and irrelevant to Third World realities Why are they reproduced How can one explain the belief that these approaches remain viable These are some of the questions addressed in this wideranging review of the literature of political development and the paradigms that have guided analysis of political change over the past thirty years Examining how

political development theories are rooted in U S foreign policy domestic political trends and changes in postwar political science Dr Gendzier grounds the traditional approach to political development in recent history and politics Her analysis raises questions about how development doctrine is related to foreign policy as well as noting development theory s debt to cold war ideology and revisionist theories of liberal democracy Dr Gendzier s interpretation sheds light on the reasons for the current theoretical bias that favors approaching politics in terms of psychology and culture an approach that she states has had devastating effects on our understanding of politics

Colonial Legacies Jeremy Adelman,2012-12-06 More than other Atlantic societies Latin America is shackled to its past This collection is an exploration of the binding historical legacies the making of slavery patrimonial absolutist states backward agriculture and the imprint of the Enlightenment with which Latin America continues to grapple Leading writers and scholars reflect on how this heritage emerged from colonial institutions and how historians have tackled these legacies over the years suggesting that these deep encumbrances are why the region has failed to live up to liberal capitalist expectations They also invite discussion about the political economic and cultural heritages of Atlantic colonialism through the idea that persistence is a powerful organizing framework for understanding particular kinds of historical processes

Political Change David E. Apter,2012-11-12 Published in the year 1973 Political Change is a valuable contribution to the field of Politics The problem in the social sciences has been to improve the quality of the relationship between the creative and didactic sides and produce more interesting and verifiable hypotheses and propositions The literature dealing with this problem has grown and become increasingly technical This collection of essays are between creativity and didactics Some are experiments in the mind as it were plundering history for purpose Others seek criteria for a politics of development Still others are more analytical seeking criteria for theory as in the articles on political studies and on political systems In all however there is a common thread the creation and use of intermediate categories and their applications to real life historical or contemporary development situations
