*Peaceful Peoples* Bruce D. Bonta, 1993-12-01 Peaceful peoples are societies that have developed harmonious social structures which allow them to get along with each other and with outsiders without violence Most of these peoples foster a spirit of cooperation rather than competition promote sharing rather than glorifying greed and live in harmony with the earth as well as with other people Perhaps most importantly they believe that peacefulness is the defining characteristic of their humanity Some of the peoples included in the book are from the Western tradition such as the Amish Hutterites Mennonites Quakers and Tristan Islanders from South America the Piaroa from Africa the Fipa from South Asia the Paliyan Malapandaram and Nayaka from Southeast Asia the Semai Chewong and Buid and from Micronesia the Ifaluk This selected bibliography includes annotated references to books articles and other English language publications that provide significant information about a peaceful society The author has combed the literature of fields such as anthropology psychology sociology history and religious studies for appropriate works with a cutoff date of 1992 Scholars and peace activists who are interested in societies that foster peacefulness have difficulty finding references to the literature Numerous indexes and abstracts do not include subject headings such as peaceful peoples Furthermore indexing services often do not cover chapters in edited volumes an important part of this literature The book includes a very detailed name and subject index that provides access to the intriguing social psychological and cultural similarities and difference existing among the peoples

**The Limits of Settlement Growth** Roland Fletcher, 1995-09-29 In this study Roland Fletcher argues that the built environment becomes a constraint on the long term development of a settlement It is costly to move settlements or to demolish and rebuild from scratch so the initial layout and buildings and the forms of communication that result may come to shackle further development and also to place constraints on social and political change Using this theoretical framework Dr Fletcher reviews worldwide settlement growth over the past 15 000 years and concludes with a major discussion of the great transformations of human settlements from mobile to sedentary sedentary to urban and urban to industrial This book is an ambitious contribution to archaeological theory and the questions it raises also have implications for the future of urban settlement
