The Inland Revenue Saint Or Sinner:

The Inland Revenue - Saint Or Sinner? John Booth, 2002 This work reviews the Inland Revenue Department from the 1849 statute of creation and the exercise of its statutory function to collect and manage inland revenues It is shown that this management stems from the authority of the Consolidated Fund Act of 1816 that created a Lord High Treasurer of Great Britain and that it held as an office by Commissioners of HM Treasury and in 2001 are the First Lord of the Treasury the prime minister and the Chancellor of the Exchequer Junior Lords are also appointed as Treasury Ministers and comprise a Treasury Board that is stated not to meet and that Board decisions are not recorded and that all are transient political appointees The interpretations of the Treasury Board are from laws made by Parliament and with the function of the courts to interpret and construe the legislation and to tell the nation and Parliament what those laws mean But it is shown that those interpretations are far from clear with many continuing to interpret the their functions for administrative convenience

Equity and Administration P. G. Turner, 2016-05-26 Each generation of lawyers in common law systems faces an important question what is the nature of equity as developed in English law and inherited by other common law jurisdictions While some traditional explanations of equity remain useful including the understanding of equity as a system that qualifies the legal rights people ordinarily have under judge made law and under legislation other common explanations are unhelpful or misleading This volume considers a distinct and little noticed view of equity By examining the ways in which courts of equity have addressed a range of practical problems regarding the administration of deliberately created schemes for the management of others affairs modern equity can be seen to have a strongly facilitative character The extent and limits on this characterisation of equity are explored in chapters covering equity s attitude to administration in various public and private settings in common law systems *The Victorian Taxpayer and the Law* Chantal Stebbings, 2009-05-07 The central element of the taxpayer s relationship with the law was the protection it afforded to ensure only the correct amount of tax was paid that it was legally levied and justly administered These legal safeguards consisted of the fundamental constitutional provision that all taxes had to be consented to in Parliament local tax administration and a power to appeal to specialist tribunals and the courts The book explains how these legal safeguards were established and how they were affected by changing social economic and political conditions They were found to be restrictive and inadequate and were undermined by the increasing dominance of the executive Though they were significantly recast they were not destroyed They proved flexible and robust and the challenge they faced in Victorian England revealed that the underlying pervasive constitutional principle of consent from which they drew their legitimacy provided an enduring protection for the taxpayer *Tax Compliance Costs for Companies in an Enlarged European Community* Michael Lang, 2008-01-01 When it comes to taxation administrative costs to the tax authorities and compliance costs to the taxpayers arise A lot of studies have already been conducted in order to shed more light on such hidden costs of taxation Particularly in the field of transfer pricing

administrative and compliance costs are assumed to be quite high due to the obligation of computing and documenting an arm's length price for each intra group transaction Apparently European policy makers have also become aware of this problem since the European Commission's report released in 2001 Company Taxation in the Internal Market recommends targeted measures in the short run and comprehensive ones in the long run crossing the border line of the currently prevailing transfer pricing approach inter alia in order to combat compliance costs in the field of transfer pricing Eighteen national reports from countries all over the world and a general report deal with the basics of administrative and compliance costs of taxation in general as well as compliance costs in the field of transfer pricing in particular The book is completed by three special reports on certain issues The findings of the reports included is greatly influenced by the discussions on the occasion of the Jean Monnet Conference on this topic which was held in spring 2006 in Rust Austria under the academic guidance of the Institute for Austrian and International Tax Law at the Vienna University of Economics and Business
