The Inner World of Unaware Phenomena Bruce J. Diamond, Amy E. Learmonth, Katherine Makarec, 2022-09-29 In this *The Inner World of Unaware Phenomena* Pathways to Brain Behavior and Implicit Memory authors Bruce J Diamond Amy E Learmonth and Katherine Makarec argue that there is an inner world within all of us that profoundly impacts our lives and that memories perceptions tastes preferences biases and beliefs are encoded and expressed on an unaware largely non conscious level In other words many aspects of our lives and actions are guided and influenced by factors about which we may know very little but which nevertheless alter the quality substance and trajectory of our lives our loves our likes and our dislikes Drawing on novel experimental designs and computer and imaging based technologies the authors demonstrate that people can react to faces and places in measurable ways despite the fact that they may profess to having never seen or visited these faces or places The authors show that these unaware phenomena are not isolated instances but rather that they permeate and influence virtually every aspect of our lives

Childhood beyond Pathology Lisa Farley, 2018-08-23 Brings psychoanalytic concepts to the notion of childhood development with a keen eye to discussions of social justice and human dignity *Childhood beyond Pathology* offers an account of the ways that psychoanalytic concepts can inform ongoing challenges of representing development belonging and relationality with a focus on debates over how children should be treated what they might know and who they should become Drawing from fiction clinical studies and courtroom and classroom contexts Lisa Farley explores a series of five conceptual figures the replacement child the neurodiverse child the

counterfeit child the child heir of historical trauma and the gender divergent child with a keen eye to discussions of social justice and human dignity The book reveals the emotional situations social tensions and political issues that shape the meaning of childhood and focuses on what happens when a child departs from normative scripts of development Through thought provoking analysis Farley develops themes that include childhood loss the myth of innocence the problem of diagnosis the subject of racial hatred the meaning of a good fight and gender embodiment She draws extensively on psychoanalytic concepts to show how the fantasy of the child advancing through lockstep stages fails to account for the child as symbolic of the conflicts of entering into the social world Childhood beyond Pathology suggests we reconsider developmental understandings of childhood by honoring the elusive qualities of inner life

Dads, Kids, and Fitness William Marsiglio,2016-10-31 Now more than ever American dads act as hands on caregivers who are devoted to keeping themselves and their families healthy Yet men are also disproportionately likely to neglect their own health care diets and exercise routines bad habits that they risk passing on to their children In Dads Kids and Fitness William Marsiglio challenges dads to become more health conscious in how they live and raise their children His conclusions are drawn not only from his revealing interviews with a diverse sample of dads and pediatric healthcare professionals but also from his own unique personal experiences as a teenage father who thirty one years later became a later life dad to a second son Marsiglio s research highlights the value of treating dads as central players in what he calls the social health matrix which can serve both healthy children and those with special needs He also outlines how schools healthcare facilities religious groups and other organizations can help dads make a positive imprint on their families health fitness and well being Anchored in compelling life stories of joy tragedy and resilience Dads Kids and Fitness extends and deepens public conversation about health at a pivotal historical moment Its progressive message breathes new life into discussions about fathering manhood and health Schwann Spectrum ,2001

In Defense of Childhood Chris Mercogliano,2007 As codirector of the Albany Free School Chris Mercogliano has had remarkable success in helping a diverse population of youngsters find their way in the world He regrets however that most kids lives are subject to some form of control from dawn until dusk Lamenting risk averse parents overstructured school days and a lack of playtime and solitude Mercogliano argues that we are robbing our young people of that precious irreplaceable period in their lives that nature has set aside for exploration and innocent discovery leaving them ill equipped to face adulthood The domestication of childhood squeezes the adventure out of kids lives and threatens to smother the spark that animates each child with talents dreams and inclinations There is plenty that those involved with children can do to protect
