The International Dimensions Of Internal Conflict Bcsia Studies In International Security:

Progress in International Relations Theory Colin Elman, Miriam Fendius Elman, 2003-08-29 All academic disciplines periodically appraise their effectiveness evaluating the progress of previous scholarship and judging which approaches are useful and which are not Although no field could survive if it did nothing but appraise its progress occasional appraisals are important and if done well can help advance the field This book investigates how international relations theorists can better equip themselves to determine the state of scholarly work in their field It takes as its starting point Imre Lakatos's influential theory of scientific change and in particular his methodology of scientific research programs MSRP It uses MSRP to organize its analysis of major research programs over the last several decades and uses MSRP's criteria for theoretical progress to evaluate these programs The contributors appraise the progress of institutional theory varieties of realist and liberal theory operational code analysis and other research programs in international relations Their analyses reveal the strengths and limits of Lakatosian criteria and the need for metatheoretical metrics for evaluating scientific progress

The Middle East Military Balance 2000-2001 Shai Feldman, Yiftah Shapir, 2001 With its wealth of current hard to find information The Middle East Military Balance offers an authoritative and indispensable guide to military capabilities in the Middle East Although Israel and its Arab neighbors have taken many steps toward peace in recent years the Middle East remains an uncertain and volatile region Stretching from Morocco to Iran the area has seen numerous international and internal conflicts in recent decades Understanding the dynamics of these conflicts requires detailed information on the military capabilities of the region's countries The Middle East Military Balance is prepared annually by the Jaffee Center for Strategic Studies in Tel Aviv Israel It is based on data from many sources including some that are unavailable to other institutes With its wealth of current hard to find information it offers an authoritative and indispensable guide to military capabilities in the Middle East Governments the media and researchers pay close attention to its data and analysis each year The Jaffee Center's new reorganized Middle East Military Balance provides the most comprehensive and objective analysis of Middle East military developments available in the open literature A first rate product Geoffrey Kemp Director of Regional Strategic Programs The Nixon Center

The Future of Turkish Foreign Policy Lenore G. Martin, 2004 Turkish foreign policy and its implications for Eurasian security

The Coming Crisis Victor A. Utgoff, 2000 How will continued proliferation of nuclear weapons change the global political order This collection of essays comes to conclusions at odds with the conventional wisdom Stephen Rosen and Barry Posen explore how nuclear proliferation may affect US incentives to confront regional aggression Stephen Walt argues that regional allies will likely prove willing to stand with a strong and ready United States against nuclear backed aggression George Quester and Brad Roberts examine long term strategic objectives in responding to nuclear attack by a regional aggressor Richard Betts highlights the potential for disastrous mistakes in moving toward and living in a world heavily populated with nuclear armed states Scott Sagan explains how the nuclear nonproliferation policies best suited to some

states can spur proliferation by others Caroline Ziemke shows how the analysis of a state's strategic personality can provide insights into why it might want nuclear weapons and how its policies may develop once it gets them And Victor Utgoff concludes that the United States seems more likely to intervene against regional aggression when the aggressor has nuclear weapons than when it does not **Case Studies and Theory Development in the Social Sciences** Alexander L.

George, Andrew Bennett, 2005-04-15 The use of case studies to build and test theories in political science and the other social sciences has increased in recent years Many scholars have argued that the social sciences rely too heavily on quantitative research and formal models and have attempted to develop and refine rigorous methods for using case studies This text presents a comprehensive analysis of research methods using case studies and examines the place of case studies in social science methodology It argues that case studies statistical methods and formal models are complementary rather than competitive The book explains how to design case study research that will produce results useful to policymakers and emphasizes the importance of developing policy relevant theories It offers three major contributions to case study methodology an emphasis on the importance of within case analysis a detailed discussion of process tracing and development of the concept of typological theories **Case Studies and Theory Development in the Social Sciences** will be particularly useful to graduate students and scholars in social science methodology and the philosophy of science as well as to those designing new research projects and will contribute greatly to the broader debate about scientific methods **Countering Terrorism**

Arnold M. Howitt, Robyn L. Pangi, 2003 Ways in which federal state and local institutions should integrate their efforts to prepare for future terrorist threats **The Limits of Culture** Brenda Shaffer, 2006 Experts analyze the effect of cultural interests on the foreign policy of states in the Caspian region including Iran Azerbaijan Armenia Georgia Afghanistan Kazakhstan and Pakistan

The International Dimensions of Internal Conflict Michael Edward Brown, 1996 Internal conflicts threaten many countries and regions globally The first part of this book examines the sources of internal conflicts and the ways these may affect neighbouring states and the international community The second part covers specific problems policy instruments and key actors **Terrorism and America** Philip B. Heymann, 2000 Examining how the United States and other democracies can fight terrorism while preserving liberty and maintaining a healthy unified society

Terrorism, Freedom, and Security Philip B. Heymann, 2003 A former Deputy Attorney General of the United States argues that we must preserve our civil liberties and democratic values while fighting terrorism On September 11 2001 the United States began to consider the terrorist threat in a new light Terrorism was no longer something that happened in other countries on other continents but became a pressing domestic concern for the US government and American citizens The nation suddenly faced a protracted struggle In **Terrorism Freedom and Security** Philip Heymann continues the discussion of responses to terrorism that he began in his widely read **Terrorism and America** He argues that diplomacy intelligence and international law should play a larger role than military action in our counterterrorism policy instead of waging war against

terrorism the United States needs a broader range of policies Heymann believes that many of the policies adopted since September 11 including trials before military tribunals secret detentions and the subcontracting of interrogation to countries where torture is routine are at odds with American political and legal traditions and create disturbing precedents Americans should not be expected to accept apparently indefinite infringements on civil liberties and the abandonment of such constitutional principles as separation of powers and the rule of law Heymann believes that the United States can guard against the continuing threat of terrorism while keeping its traditional democratic values in place **The Middle East**

Military Balance, 2001-2002 Shlomo Brom,Yiftah Shapir,2002 Up to date authoritative information on military capabilities in the Middle East The explosion of violence between Israelis and Palestinians that began in late 2000 is a tragic reminder of the potential for armed conflict in the Middle East Although many developments in the 1990s appeared to have reduced the likelihood of war in the region stability between Israel and its Arab neighbors remains tenuous Security in the Persian Gulf also remains uncertain as Iran and Iraq have continued their pursuit of weapons of mass destruction Understanding the dynamics of security in the Middle East requires detailed information on the military capabilities of the region s countries The Middle East Military Balance is prepared annually by the Jaffee Center for Strategic Studies in Tel Aviv It is based on data from many sources including some that are unavailable to other institutes With its wealth of current hard to find information it offers an authoritative and indispensable guide to military capabilities in the Middle East Governments the media and researchers pay close attention to its data and analysis each year *Bridges and Boundaries* Colin Elman,Miriam Fendius Elman,2001-04-13 Bridges and Boundaries offers a conversation between what might loosely be described as traditionalist diplomatic and military historians and political scientists who employ qualitative case study methods to examine international relations The book opens with a series of chapters discussing differences commonalities and opportunities for cross fertilization between the two disciplines To help focus the dialogue on real events and research the volume then revisits three empirical topics that have been studied at length by members of both disciplines British hegemony in the nineteenth century diplomacy in the interwar period and the causes of World War II and the origins and course of the Cold War For each of these subjects a political scientist a historian and a commentator reflect on how disciplinary guild rules have shaped the study of international events The book closes with incisive overviews by Robert Jervis and Paul W Schroeder Bridges and Boundaries explores how historians and political scientists can learn from one another and illustrates the possibilities that arise when open minded scholars from different disciplines sit down to talk Keeping the Edge Ashton B. Carter,John P. White,2001 How the US can rectify organizational and managerial problems to maximize its military effectiveness

Holding the Line Cindy Williams,2001 An objective and detailed look at the American defense budget and military strategy **Fighting Words** Michael Edward Brown,Sumit Ganguly,2003 A study of the impact of language policies on ethnic relations in fifteen Asian and Pacific countries **America's Achilles' Heel** Richard A Falkenrath,Robert D

Newman, Bradley A. Thayer, 1998-07-08 Nuclear biological and chemical NBC weapons delivered covertly by terrorists or hostile governments pose a significant and growing threat to the United States and other countries Although the threat of NBC attack is widely recognized as a central national security issue most analysts have assumed that the primary danger is military use by states in war with traditional military means of delivery The threat of covert attack has been imprudently neglected Covert attack is hard to deter or prevent and NBC weapons suitable for covert attack are available to a growing range of states and groups hostile to the United States At the same time constraints on their use appear to be eroding This volume analyzes the nature and limits of the covert NBC threat and proposes a measured set of policy responses focused on improving intelligence and consequence management capabilities to reduce U S vulnerability About the authors Richard A Falkenrath is Assistant Professor of Public Policy at Harvard s Kennedy School of Government He served as Executive Director of the Belfer Center for Science and International Affairs BCSIA and before that as a Research Fellow He is the author and co author of *Shaping Europe s Military Order* 1995 *Avoiding Nuclear Anarchy* 1996 *America s Achilles Heel* Nuclear Biological Chemical Terrorism and Covert Attack 1998 and numerous journal articles and chapters of edited volumes Falkenrath has been a Visiting Research Fellow at the German Society of Foreign Affairs DGAP in Bonn He holds a PhD from the Department of War Studies King s College London where he was a British Marshall Scholar and is a summa cum laude graduate of Occidental College Los Angeles with degrees in economics and international relations He is on leave in 2001 2002 and is currently serving as Director for Counterproliferation and Homeland Defense at the National Security Council Bradley A Thayer is Assistant Professor of Political Science at the University of Minnesota Duluth

Biological Weapons

Joshua Lederberg, 1999 foreword by William S Cohen U S Secretary of Defense Biological weapons pose a horrifying and growing threat to the United States and to the world in general Revelations about Iraq s weapons research and the plans of the Aum Shinrikyo cult in Japan serve as frightening reminders of the potential for military or terrorist use of biological agents The essays in this book many of which were originally published in the *Journal of the American Medical Association* examine the medical scientific and political dimensions of limiting the threat posed by biological weapons The contributors consider the current threat posed by biological weapons the history of attempts to control them episodes in which biological agents have been used Iraq s biological warfare program and policies that the United States might pursue to reduce the threat Contributors Suzanne Barth Pamela Berkowsky Kristin A Birkness Stephen Black W Russell Byrne W Seth Carus Marie Chevrier George W Christopher Theodore J Cieslak Richard Danzig Edward M Eitzen Jr Charles C Engel James R Ferguson Laurence R Foster David R Franz Arthur M Friedlander Carol S Fullerton Jeanne Guillemin Charles E Haley Harry C Holloway David L Hoover John M Horan Martin Hugh Jones Peter B Jahrling Robert P Kadlec Akiko Kimura Shellie A Kolavic Alexander Langmuir John R Livengood Karl Lowe Steven Mauvais David J McClain Matthew Meselson Ann E Norwood Julie A Pavlin Graham S Pearson Ilona Popova Alexis Shelokov Jeffrey D Simon Shauna L Simons Michael R Skeels Laurence
