**Technology, Development, and Democracy** Juliann Emmons Allison, 2012-02-01 Technology Development and Democracy examines the growing role of the Internet in international affairs from a source of mostly officially sanctioned information to a venue where knowledge is often merged with political propaganda rhetoric and innuendo The Internet not only provides surfers with up to the minute stories including sound and visual images and opportunities to interact with one another and experts on international issues but also enables anyone with access to a computer modem and telephone line to influence international affairs directly What does this portend for the future of international politics The contributors respond by providing theoretical perspectives and empirical analyses for understanding the impact of the communications revolution on international security the world political economy human rights and gender relations Internet technologies are evaluated as sources of change or continuity and as contributors to either conflict or cooperation among nations While the Internet and its related technologies hold no greater certain prospect for positive change than previous technological advances they arguably do herald significant advances for democracy the democratization process and international peace

Barry Jones, 2013-11-07 Globalisation and Interdependence in the International Political Economy addresses central developments within the contemporary international system The notions of interdependence and globalisation that have accompanied the political discourse of a new world disorder are replete with definitional ambiguities theoretical difficulties and empirical complexities Barry Jones offers a critical review and analysis of these concepts their significance and place within the wider debates of international political economy He argues that contemporary conditions are complex with regionalising tendencies cross cutting those of increasing globalisation and national impulses surviving even in the face of powerful internationalising forces Future developments it is concluded may also be far more uncertain and turbulent than is widely anticipated Written by a leading authority this volume is an effective and compelling introduction to the complex study of international political economy

factors in the competitive advantage of nations Today however the new international political economy is being increasingly driven by science and technology in new ways Integration globalization and internationalization have all become watchwords for a series of dynamic processes in which science and technology are deeply implicated As a result not only are the policies of national governments being exposed in terms of the limits of their sovereignty but science and technology are being increasingly implicated in a wide array of public issues ranging from security privacy development and economic growth to employment environment foreign policy and geopolitics Clearly in today s emerging world the ways in which governments organize their science and technology policy their science and technology intelligence and their research advisory structures and resources matter more today than ever before In turn the contract between science and democracy is being rapidly redefined This book is the first to comprehensively discuss these critical issues      **Power and Policy in Quest of Law**
