Bibliography Pierre Villars, Karin Cenxual, Marinella Penzo, 2012-12-21 By browsing about 10 000 000 scientific articles of over 200 major journals mainly in a cover to cover approach some 200 000 publications were selected The extracted data is part of the following fundamental material research fields crystal structures S phase diagrams also called constitution C and the comprehensive field of intrinsic physical properties P This work has been done systematically starting with the literature going back to 1900 The above mentioned research field codes S C P as well as the chemical systems investigated in each publication were included in the present work The aim of the Inorganic Substances Bibliography is to provide researchers with a comprehensive compilation of all up to now published scientific publications on inorganic systems in only three handy volumes Ferroelectric Materials and Ferroelectricity T. F. Connolly, 2013-11-11 This volume is a joint effort of the Research Materials Information Center RMIC of the Solid State Division at Oak Ridge National Laboratory and the Libraries and Information Systems Center at Bell Telephone Laboratories BTL Murray Hill N J The Research Materials Information Center has since 1963 been answering inquiries on the availability preparation and properties of inorganic solid state research materials The preparation of bibliographies has been essential to this function and the interest in ferroelectrics led to the compilation of the journal and report literature on that subject The 1962 book *Ferroelectric Crystals* by Jona and Shirane was taken as a cutoff point and all papers through mid 1969 received by the Center have been included The Libraries and Information Systems Center of BTL has over a period of years developed a proprietary package of computer programs called BELDEX which formats and generates indexes to bibliographic material This group therefore undertook to process RMIC's ferroelectric references by BELDEX so that both laboratories could have the benefit of an indexed basic bibliography in this important research area Energy Research Abstracts ,1977 Semiannual with semiannual and annual indexes References to all scientific and technical literature coming from DOE its laboratories energy centers and contractors Includes all works deriving from DOE other related government sponsored information and foreign nonnuclear information Arranged under 39 categories e g Biomedical sciences basic studies Biomedical sciences applied studies Health and safety and Fusion energy Entry gives bibliographical information and abstract Corporate author subject report number indexes *MXene Nanocomposites* Poushali Das, Andreas Rosenkranz, Sayan Ganguly, 2023-05-30 MXenes offer single step processing excellent electrical conductivity easy heat dissipation behavior and capacitor like properties and are used in photodetectors lithium ion batteries solar cells photocatalysis electrochemiluminescence sensors and supercapacitors Because of their superior electrical and thermal conductivities these composites are an ideal choice in electromagnetic interference EMI shielding *MXene Nanocomposites Design Fabrication and Shielding Applications* presents a comprehensive
