is made to be accessible and as close to only manufacturing cost as possible This third volume of Theories of Surplus Value covers the confusion between the concepts of commodity and capital constant and variable capital and over production the problem of the relativizing the categories of value and equivalence John Stuart Mill s reduction of Ricardian s economic theories and the reductions of surplus value into profit theory and as Marx continually says its descent into being vulgar political economy These three volumes in totality are to show how the classical theories of value led to a theory stuck within the market paradigm and caught in the loop of capitalist circularity For Marx the current ontology of political economy only ruled within the scope of pragmatism within the market system and these programs no longer offered any integrated theory of capitalism *Surplus Utilisation in Agriculture* Ratan Khasnabis,Jyotiprakash Chakraborty,1989 **Capital: The process of capitalist production as a whole, ed. by Frederick Engels.
