*Schools* Hal A. Lawson,Dolf van Veen,2015-12-14 This book focuses on special organizational configurations for schools in diverse parts of the world Some of these new organizational and institutional designs are called multi service schools others are called extended service schools and still others are called community learning centers While these schools have different names and notable different characteristics they belong in the same category because of a common feature in their design they connect schools with once separate community programs and services Chief among the prototypes for these new

organizational and institutional designs are the ones featured in the book's title. Some are called multi-service schools to indicate that they selectively provide some new programs and services. Others are called extended service schools to indicate that they serve young people beyond the regular school day seeking influence and control over out-of-school time while enabling alternative teaching/learning strategies and providing services other than typical pupil support services. Still others are called community learning centers, a name that showcases the educational functions and priorities of schools and announcing priorities for adult learning and development. Community schools, still called in some places full-service community schools, serves as a prototype that increasingly positions schools as multi-purpose, multi-component anchor institutions serving identifiable neighborhoods and entire rural communities. The book is structured to enhance understanding of these organizational prototypes and provides comparative social analysis. It also identifies knowledge needs and gaps as well as developmental territory for the future. *The Arthurdale Community School* Sam F. Stack Jr., 2016-04-08

The first of many homestead communities designed during the rollout of the New Deal, Arthurdale, West Virginia, was a bold experiment in progressive social planning. At the center of the settlement was the school, which was established to improve the curriculum offered to Appalachian students. Offering displaced and unemployed coal miners and their families new opportunities, the school also helped those in need to develop a sense of dignity during the Great Depression. The first book-length study of the well-known educational experiment, *The Arthurdale Community School*, illuminates the institution's history, influence, and impact. Founded on American philosopher and reformer John Dewey's idea that learning should be based not on competition but on community and informed by First Lady Eleanor Roosevelt's guidance, the Arthurdale project sought to enable both children and adults to regain a sense of identity and place by studying the history and culture of Appalachia. Its goal was not to produce workers for global capitalism but to provide citizens with the tools to participate in a democracy. Author Sam F. Stack Jr. examines both the successes and failures of this famous progressive experiment, providing an in-depth analysis of the Arthurdale School's legacy. A fascinating study of innovation and reform in Appalachia, Stack's book also investigates how this project's community model may offer insights into the challenges facing schools today. *PDS and Community Schools* JoAnne Ferrara, Janice L. Nath, Ronald Beebe, 2022-07-01

How the Professional Development School and Community School strategy might benefit from an integrated perspective serves as the guiding framework for this volume of *Research in Professional Development Schools*. This book advocates for blending these two approaches to address the needs of P-20 settings and their communities. Because we recognize the inherent strengths in both models, we encouraged chapters that had as a primary focus one or both models as they sought to support teacher preparation and K-12 partners. Subsequently, a series of questions framed the conversation around the potential for combining these models as well as what such an integrated model might present for teacher education programs, K-12 partners, and their communities. Since this volume explores three different aspects of the relationship between Professional Development Schools and Community

Schools a set of guiding questions were offered to guide the specific models addressed *Community Schools in Action* Joy G. Dryfoos, Jane Quinn, Carol Barkin, 2005-03-24 *Community Schools in Action* Lessons from a Decade of Practice presents the Children's Aid Society's CAS approach to creating community schools for the 21st century CAS began this work in New York City more than a decade ago and today operates thirteen such schools in the low income neighborhoods of Washington Heights East Harlem and the Bronx Through a technical assistance center operated by CAS hundreds of other schools across the country and the world are adapting this model The contributors to the volume supply invaluable information about the selected program components based on their own experiences working with community schools They describe how and why CAS started its community school initiative and explain how CAS community schools are organized integrated with the school system sustained and evaluated
