The March Of Philosophy:

The March of Philosophy Henry Alpern, 1968 **The March of Philosophy** Hymen Alpern, 1968 **Amit Shah and the March of BJP** Anirban Ganguly, Shiwanand Dwivedi, 2019-05-30 The story of Amit Shah's political life struggles rise and triumph is little known For a leader who is often referred to as the Chanakya of Indian politics who has dominated India's fast paced and complex political stage since 2014 has altered its electoral map by leading the Bharatiya Janata Party BJP to successive historic victories post the May 2014 general elections there is very little that is recorded or narrated So it's no surprise that the curiosity he evokes is ever on the rise Most of what is written about Amit Shah is based on conjectures hearsay assumptions and biases The real Amit Shah the once booth worker and now national president of the largest political party in the world the master strategist who has pushed the BJP to an organisational pinnacle and yet talks of scaling peaks a man who is unhesitant in his stand on nationalism and on anything which concerns India's national interest has remained in the shadows self effaced away from the limelight The story of how he expanded the BJP into a pan India party and the convergence of organisational science and ideology that has made the BJP a unique and formidable political entity is a story that needs to be told The book narrates the personal and political journey of Amit Shah captures the ideological world that shaped him and gives an account of the party that he is leading and shaping today It is for the first time that his story is being told an authentic no holds barred portrayal of one of the most influential leaders of our times To the political worker the observer and to anyone even remotely interested in Indian politics irrespective of their profession or political leaning especially since the unfolding of Indian politics in the summer of 2014 this is a captivating exploration of the political life and journey of one of its central characters **The March of the Libertines** M. R. Wielema, 2004 **Inventions of the March Hare** Thomas Stearns Eliot, 1996 Presents over fifty poems written by the author in his twenties including early drafts of famous poems and extensive critical notes on the works **Space and the 'March of Mind'** Alice Jenkins, 2007-01-18 This book is about the idea of space in the first half of the nineteenth century It uses contemporary poetry essays and fiction as well as scientific papers textbooks and journalism to give a new account of nineteenth century literature's relationship with science In particular it brings the physical sciences physics and chemistry more accessibly and fully into the arena of literary criticism than has been the case until now Writers whose work is discussed in this book include many who will be familiar to a literary audience including Wordsworth Coleridge and Hazlitt some well known in the history of science including Faraday Herschel and Whewell and a raft of lesser known figures Alice Jenkins draws a new map of the interactions between literature and science in the first half of the nineteenth century showing how both disciplines were wrestling with the same central political and intellectual concerns regulating access to knowledge organising knowledge in productive ways and formulating the relationships of old and new knowledges Space has become a subject of enormous critical interest in literary and cultural studies Space and the March of Mind gives a wide ranging account of how early nineteenth century writers

thought about and thought with space Burgeoning mass access to print culture combined with rapid scientific development to create a crisis in managing knowledge Contemporary writers tried to solve this crisis by rethinking the nature of space Writers in all genres and disciplines from all points on the political spectrum returned again and again to ideas and images of space when they needed to set up or dismantle boundaries in the intellectual realm and when they wanted to talk about what kinds of knowledge certain groups of readers wanted needed or deserved This book provides a rich new picture of the early nineteenth century s understanding of its own culture

The March of Unreason Dick Taverne,2006-11-29 Our daily news bulletins bring us tales of the wonder of science from Mars rovers and intelligent robots to developments in cancer treatment and yet often the emphasis is on the potential threats posed by science It appears that irrationality is on the rise in western society and public opinion is increasingly dominated by unreflecting prejudice and unwillingness to engage with factual evidence From genetically modified crops and food organic farming the MMR vaccine environmentalism the precautionary principle and the new anti capitalist and anti globalisation movements the rejection of the evidence based approach nurtures a culture of suspicion distrust and cynicism and leads to dogmatic assertion and intolerance In this compelling and timely examination of science and society Dick Taverne argues that science with all the benefits it brings is an essential part of civilised and democratic society it offers the most hopeful future for mankind

The March of Spare Time Susan Currell,2010-11-24 In The March of Spare Time Susan Currell explores how and why leisure became an object of such intense interest concern and surveillance during the Great Depression As Americans experienced record high levels of unemployment leisure was thought by reformers policy makers social scientists physicians labor unions and even artists to be both a cause of and a solution to society s most entrenched ills Of all the problems that faced America in the 1930s only leisure seemed to offer a panacea for the rest The problem centered on divided opinions over what constituted proper versus improper use of leisure time On the one hand sociologists and reformers excoriated as improper such leisure activities as gambling loafing and drinking On the other the Works Progress Administration and the newly professionalized recreation experts promoted proper leisure activities such as reading sports and arts and crafts Such attention gave rise to new ideas about how Americans should spend their free time to better themselves and their nation These ideas were propagated in social science publications and proliferated into the wider cultural sphere Films fiction and radio also engaged with new ideas about leisure more extensively than has previously been recognized In examining this wide spectrum of opinion Currell offers the first full scale account of the fears and hopes surrounding leisure in the 1930s one that will be an important addition to the cultural history of the period

Asian traditions this book examines varieties of thought and self transformative practice that do not fit neatly on one side or another of the standard Western division between philosophy and religion It contains chapters by experts on Buddhist Confucian Taoist Hindu and Jain philosophies as well as ancient Greek philosophy and recent contemplative and spiritual movements The volume also problematizes the notion of a Western philosophical canon distinguished by rationality in contrast to a religious Eastern other These original essays creatively lay the groundwork needed to rethink dominant historical and conceptual categories from a wider perspective to arrive at a deeper more plural and global understanding of the diverse nature of both philosophy and religion The volume will be of keen interest to scholars and students in the Philosophy of Religion Asian and Comparative Philosophy and Religious Studies Future Seeing and Philosophy of Philosophies ...
