Horman Chitonge, 2015-01-09 In recent years Africa has undergone the longest period of sustained economic growth in the continent's history drawing the attention of the international media and academics alike This book analyses the Africa Rising narrative from multidisciplinary perspectives offering a critical assessment of the explanations given for the poor economic growth and development performance in Africa prior to the millennium and the dramatic shift towards the new Africa Bringing in perspectives from African intellectuals and scholars many of whom have previously been overlooked in this

debate the book examines the construction of Africa's economic growth and development portraits over the years. It looks at two institutions that play a vital role in African development providing a detailed explanation of how the World Bank and the IMF have interpreted and dealt with the African challenges and experiences. The insightful analysis reveals that if Africa is rising only 20-30 per cent of Africans are aboard the rising ship and the main challenge facing the continent today is to bring on board the majority of Africans who have been excluded from growth. This book makes the complex and sometimes confusing debates on Africa's economic growth experience more accessible to a wide range of readers interested in the Africa story. It is essential reading for students and researchers in African Studies and will be of great interest to scholars in Development Studies, Political Economy and Development Economics. *The Workers' State Meets the Market* Sarah Cook, Margaret Maurer-Fazio, 2013-10-23. This book provides a rare integrative interpretation of government enterprise relations in China offering readers a comprehensive understanding of the topic. Focusing on the government and its principal goals it describes the transition of government enterprise relations and highlights the embedding of the entities of government and enterprises in specific political, economic and social environments. Further it analyzes how the government's institutional arrangement regulates the behavior of various types of enterprises with different structures and the logic mechanisms such institutional arrangements use to change and shape government enterprise relations. Based on these issues and logic mechanisms the book points out the complexity of government enterprise relations and the diversity of their transition path thus reflecting some typical features in the overall reform of China and discussing specific factors related to China's social development experience. Development Challenges in the 1990s Tim Besley, N. Roberto Zagha, 2005-04-01. The 1990s was a decade of historical significance with numerous and remarkable changes. It was also a time of considerable reforms that strengthened the policy framework in a large number of countries. Yet the resulting growth experiences of developing countries have been extremely varied and often below expectations. What have we learned from this experience? And how can these lessons be applied to the challenges we face in the new millennium? *Development Challenges in the 1990s* brings together the insights and experiences of some of the world's leading policymakers and global thought leaders individuals who have had substantial influence on the policy reforms and development strategies in their native countries. Sharing their unique perspectives these practitioners of development explain the reasons for the uneven outcomes of the 1990s and with the benefit of hindsight draw relevant lessons for the future.
