Goodwin, 1974 **An Historical Geography of Modern Australia** Joseph Michael Powell, 1991-04-04 This is a substantial study immediately established itself as essential reading for all those with a serious interest in Australian studies **A History of Australasian Economic Thought** Alex Millmow, 2017-07-14 This book explains how Australian and New Zealand economists exerted influence on economic thought and contributed to the economic life of their respective countries in the twentieth century Besides surveying theorists and innovators this book also considers some of the key expositors and builders of the academic economics profession in both countries The book covers key economic events including the Great Depression the Second World War the post war boom and the great inflation that overtook it and lastly the economic reform programs that both Australia and New Zealand undertook in the 1980s *Archibald Liversidge, FRS* Roy M. MacLeod, 2009 When Archibald Liversidge first arrived at Sydney University in 1872 as reader in Geology and Assistant in the Laboratory he had about ten students and two rooms in the main building In 1874 he became professor of geology and mineralogy and by 1879 he had persuaded the senate to open a faculty of science He became its first dean in 1882 In 1880 he visited Europe as a trustee of the Australian Museum and his report helped to establish the Industrial Technological and Sanitary Museum which formed the basis of the present Powerhouse Museum s collection Liversidge also played a major role in the setting up of the Australasian Association for the Advancement of Science which held its first congress in 1888 For anyone interested in Archibald Liversidge his contribution to crystallography mineral chemistry chemical geology strategic minerals policy and a wider field of colonial science *A Science of Our Own* Peter H. Hoffenberg, 2019-10-22 When the Reverend Henry Carmichael opened the Sydney Mechanics School of Arts in 1833 he introduced a bold directive for Australia to advance on

the scale of nations it needed to develop a science of its own Prominent scientists in the colonies of New South Wales and Victoria answered this call by participating in popular exhibitions far and near from London s Crystal Place in 1851 to Sydney Melbourne Adelaide and Brisbane during the final decades of the nineteenth century A Science of Our Own explores the influential work of local botanists chemists and geologists William B Clarke Joseph Bosisto Robert Brough Smyth and Ferdinand Mueller who contributed to shaping a distinctive public science in Australia during the nineteenth century It extends beyond the political underpinnings of the development of public science to consider the rich social and cultural context at its core For the Australian colonies as Peter H Hoffenberg argues these exhibitions not only offered a path to progress by promoting both the knowledge and authority of local scientists and public policies they also ultimately redefined the relationship between science and society by representing and appealing to the growing popularity of science at home and abroad

An Empire on Display Peter H. Hoffenberg,2001 The exhibitions of the Victorian and Edwardian eras are the lens through which this book examines the economic cultural and social forces that helped define Britain and the Empire It focuses on exhibitions in England Australia and India from the Great Exhibition to the Festival of Empire

The Empire Strikes Back? Andrew S. Thompson,2014-09-11 The Empire Strikes Back will inject the empire back into the domestic history of modern Britain In the nineteenth century and for much of the twentieth century Britain s empire was so large that it was truly the global superpower Much of Africa Asia and America had been subsumed Britannia s tentacles had stretched both wide and deep Culture Religion Health Sexuality Law and Order were all impacted in the dominated countries The Empire Strikes Back shows how the dependent states were subsumed and then hit back affecting in turn England itself

Feminist Perspectives on Equity and Trusts Susan Scott-Hunt,Hilary Lim,2013-06-17 Previous collections of essays on equity and trusts law have focused on doctrinal issues only occasionally giving a policy gloss or suggestion of social context and impact Although a critical approach can be glimpsed in journal articles and student texts this collection of essays draws together both feminist and critical material It is unique in being written by feminists in dealing with equity and trusts as a whole and in being written in the critical tradition

Foucault and Family Relations Malcolm Voyce,2019-05-14 Foucault and Family Relations Governing from a Distance in Australia analyzes how notions of property ownership were instrumental in maintaining family stability and continuity in

rural Australia outlining how inheritance and divorce laws functioned to govern the internal relationships of families to assist the state to rule from a distance Using a selection of Foucault's ideas on the family sexuality race space and economics this book shows how property operated as a disciplinary device which was underpinned by technical ideas such as surveying and cartography This book uses legal judgments as a form of ethnography to show how property as a socio technical device allowed a degree of local freedom for owners This aspect of property allowed the state to stimulate ideas of local freedom to assist in ruling from a distance demonstrating how the rural family as a domestic unit became a key field of intervention for the state as the family represented a bridge to larger relationships of power

Replenishing the Earth James Belich, 2011-05-05 Why are we speaking English Replenishing the Earth gives a new answer to that question uncovering a settler revolution that took place from the early nineteenth century that led to the explosive settlement of the American West and its forgotten twin the British West comprising the settler dominions of Canada Australia New Zealand and South Africa Between 1780 and 1930 the number of English speakers rocketed from 12 million in 1780 to 200 million and their wealth and power grew to match Their secret was not racial or cultural or institutional superiority but a resonant intersection of historical changes including the sudden rise of mass transfer across oceans and mountains a revolutionary upward shift in attitudes to emigration the emergence of a settler boom mentality and a late flowering of non industrial technologies wind water wood and work animals especially on settler frontiers This revolution combined with the Industrial Revolution to transform settlement into something explosive capable of creating great cities like Chicago and Melbourne and large socio economies in a single generation When the great settler booms busted as they always did a second pattern set in Links between the Anglo wests and their metropolises London and New York actually tightened as rising tides of staple products flowed one way and ideas the other This re colonization re integrated Greater America and Greater Britain bulking them out to become the superpowers of their day The Settler Revolution was not exclusive to the Anglophone countries Argentina Siberia and Manchuria also experienced it But it was the Anglophone settlers who managed to integrate frontier and metropolis most successfully and it was this that gave them the impetus and the material power to provide the world's leading super powers for the last 200 years This book will reshape understandings of American British and British dominion histories in the long 19th century It is a story that has such crucial implications for the histories of settler societies the homelands that spawned them and the indigenous peoples who resisted them that their full histories cannot be written without it
