The Importance Of Living A Lyrical Philosophy:

The Importance of Living: "Chinese Lifestyle" Lin Yutang, 2025-01-05 The Importance of Living by Lin Yutang is a philosophical book that offers a unique perspective on daily life and traditional Chinese thought. The book explores various aspects of living a happy and balanced life with a focus on the importance of mental peace and accepting the complexities of life. In the book, Lin Yutang delves into the concept of living simply and without complications. He examines traditional Chinese culture ideas of comfort and moderation, emphasizing how people often search for happiness in external sources while the true secret lies in inner contentment. The book is essentially a call for relaxation and peace with oneself and the surrounding world away from the noise of modern life and excessive pressures. Lin Yutang ties this to traditional concepts like Tao and life balance, suggesting that people could be happier if they were more mindful in appreciating the everyday moments and seeking meaning in simplicity. Overall, The Importance of Living serves as a guide for those seeking a more comfortable and fulfilling life free from materialism and constant worry. *Dictionary of Modern American Philosophers* John R. Shook, 2005-01-01 The Dictionary of Modern American Philosophers includes both academic and non-academic philosophers and a large number of female and minority thinkers whose work has been neglected. It includes those intellectuals involved in the development of psychology, pedagogy, sociology, anthropology, education, theology, political science, and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century. Each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. While all the major post-Civil War philosophers are present, the most valuable feature of this dictionary is its coverage of a huge range of less well-known writers, including hundreds of presently obscure thinkers. In many cases, the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers. This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought. Cultural Responses to Occupation in Japan Adam Broinowski, 2016-01-14 Cultural Responses to Occupation in Japan examines how the performing arts and the performing body specifically have shaped and been shaped by the political and historical conditions experienced in Japan during the Cold War and post-Cold War periods. This study of original and secondary materials from the fields of theatre, dance, performance art, film, and poetry probes the interrelationship that exists between the body and the nation-state. Important artistic works such as Ankoku Butoh, dance of darkness, and its subsequent re-interpretation by a leading political performance company, Gekidan Kaitaisha, theatre of deconstruction, are analysed using ethnographic, historical, and theoretical modes. This approach reveals the nuanced and prolonged effects of military, cultural, and political occupation in Japan over a duration of dramatic change. Cultural Responses to Occupation in Japan explores issues of discrimination, marginality, trauma, memory, and the mediation of history in a groundbreaking work that will be of great significance to anyone interested in the symbiosis of culture and conflict. **Chinese**

The Emergence of the Lyric Canon

Theodora A. Hadjimichael, 2019 *The Hellenistic period* was an era of literary canons of privileged texts and collections. One of the most stable of these consisted of the nine rarely ten lyric poets whether the selection was based on poetic quality, popularity or the availability of texts in the Library of Alexandria. The Lyric Canon offers a valuable and revealing window on the reception and survival of lyric in antiquity. This volume explores the complexities inherent in the process by which lyric poetry was canonized and discusses questions connected with the textual transmission and preservation of lyric poems from the archaic period through to the Hellenistic era. It firstly contextualizes lyric poetry geographically and then focuses on a broad range of sources that played a critical role in the survival of lyric poetry in particular comedy. Plato, Aristotle's Peripatetic school and the Hellenistic scholars to discuss the reception of the nine canonical lyric poets and their work. By exploring the ways in which fifth and fourth century sources interpreted lyric material and the role they played both in the scholarly work of the Alexandrians and in the creation of what we conventionally call the Hellenistic Lyric Canon, it elucidates what can be defined as the prevailing pattern in the transmission of lyric poetry as well as the place of Bacchylides as a puzzling exception to this norm. The overall discussion conclusively demonstrates that the canonizing process of the lyric poets was already at work from the fifth century BC and that it is reflected both in the evaluation of lyric by fourth century thinkers and in the activities of the Hellenistic scholars in the Library of Alexandria. The Thing and Art Arvydas Šliogeris, 2009

On the grounds of the interpretation of Rainer Maria Rilke's poetry and Paul Cézanne's paintings, the book attempts to approach the work of art as a thing. This lets us to overcome a one-sided aesthetical interpretation of the origin of the work of art and to indicate its place in the cosmos of uncreated, i.e. not hominized things. So the second fundamental issue raised is a try to point out a metaphysical difference between a hominized and not hominized natural thing. Such a non-aesthetical point of view is called *ontotopy* by the author and is opposed to traditional ontology and the philosophy of art.

Lyric Orientations Hannah Vandegrift Eldridge, 2016-01-18 In *Lyric Orientations* Hannah Vandegrift Eldridge explores the power of lyric poetry to stir the social and emotional lives of human beings in the face of the ineffable nature of our mortality. She focuses on two German speaking masters of lyric prose and poetry: Friedrich Hölderlin (1770-1843) and Rainer Maria Rilke (1875-1926). While Hölderlin and Rilke are stylistically very different, each believes in the power of poetic language to orient us as social beings in contexts that otherwise can be alienating. They likewise share the conviction that such alienation cannot be overcome once and for all in any universal event. Both argue that to deny the uncertainty created by the absence of any such event or to deny the alienation itself is likewise to deny the particularly human condition of uncertainty and mortality. By drawing on the work of Stanley Cavell, who explores how language in all its formal aspects actually enables us to engage meaningfully with the world, Eldridge challenges poststructuralist scholarship which stresses the limitations, even the failure of language in the face of reality. Eldridge provides detailed readings of Hölderlin and Rilke and positions them in a broader narrative of modernity that helps make sense of their difficult and occasionally contradictory self.

characterizations Her account of the orienting and engaging capabilities of language reconciles the extraordinarily ambitious claims that Hölderlin and Rilke make for poetry that it can create political communities that it can change how humans relate to death and that it can unite the sensual and intellectual components of human subjectivity and the often difficult fragmented or hermetic nature of their individual poems Fernando Pessoa and the Lyric Irene
