Renzi,2004-03-24 Jules Verne Voila a name that resonates with visions of fantastic adventures and images of exotic exploits In his voyages extraordinaires the noted French author fuses his encyclopedic knowledge of science and geography with his ability to tell fascinating tales taking his readers on unprecedented journeys across the globe into the earth and out into space This revered writer who with his boundless imagination had hoped to contribute substantially to the world of letters has surpassed that expectation to become coincidentally a significant influence on film Jules Verne on Film is both a penetrating analytical overview of Verne s epic novels and a comprehensive filmography

of the numerous films inspired by his stories and characters There are the obvious adaptations that come directly from the pages of Verne's writings films such as *In Search of the Castaways* and *Mysterious Island* However looking closely at the plots characters and themes of many other films science fiction and otherwise one discovers that the incomparable Verne has had a far wider influence on filmmakers than one might have thought For instance most of us are familiar with Disney's *20 000 Leagues Under the Sea* 1954 and some of us may have even seen the two 1997 television productions But Verne's classic undersea adventure also provides the underpinnings for such entertaining movies as *Fantastic Voyage* 1966 and *Innerspace* 1987 Structurally *Jules Verne on Film* begins with a biographical sketch and contains 23 chapters arranged alphabetically according to book title starting with *The Adventures of Captain Hatteras* and ending with *Voyage Across the Impossible* Each chapter includes a summary and analysis of Verne's story followed by a chronological treatment of the cinematic adaptations compared to their respective written work Production credits appear in the film entries along with plot synopses and thorough critical commentaries

The Children's Film Noel Brown, 2017-05-16 Films for children and young people are a constant in the history of cinema from its beginnings to the present day This book serves as a comprehensive introduction to the children's film examining its recurrent themes and ideologies and common narrative and stylistic principles Opening with a thorough consideration of how the genre may be defined this volume goes on to explore how children's cinema has developed across its broad historical and geographic span with particular reference to films from the United States Britain France Denmark Russia India and China Analyzing changes and continuities in how children's film has been conceived it argues for a fundamental distinction between commercial productions intended primarily to entertain and non commercial films made under pedagogical principles and produced for purposes of moral and behavioral instruction In elaborating these different forms this book outlines a history of children's cinema from the early days of commercial cinema to the present explores key critical issues and provides case studies of major children's films from around the world

Journeys on Screen Louis Bayman, 2018-11-14 Addressing the appeal of the journey narrative from pre cinema to new media and through documentary fiction and the spaces between this collection reveals the journey to be a persistent presence across cinema and in cultural modernity

Oil Culture Ross Barrett, Daniel Worden, 2014-10-15 In the 150 years since the birth of the petroleum industry oil has saturated our culture fueling our cars and wars our economy and policies But just as thoroughly culture saturates oil So what exactly is oil culture This book pursues an answer through petrocultural history in literature film fine art wartime propaganda and museum displays Investigating cultural discourses that have taken shape around oil these essays compose the first sustained attempt to understand how petroleum has suffused the Western imagination The contributors to this volume examine the oil culture nexus beginning with the whale oil culture it replaced and analyzing literature and films such as *Giant* *Sundown* Bernardo Bertolucci's *La Via del Petrolio* and Ben Okri's *What the Tapster Saw* corporate art museum installations and contemporary photography and in apocalyptic visions of environmental disaster and

science fiction By considering oil as both a natural resource and a trope the authors show how oil's dominance is part of culture rather than an economic or physical necessity Oil Culture sees beyond oil capitalism to alternative modes of energy production and consumption Contributors Georgiana Banita U of Bamberg Frederick Buell Queens College Gerry Canavan Marquette U Melanie Doherty Wesleyan College Sarah Frohardt Lane Ripon College Matthew T Huber Syracuse U Dolly Jrgensen Ume U Stephanie LeMenager U of Oregon Hanna Musiol Northeastern U Chad H Parker U of Louisiana at Lafayette Ruth Salvaggio U of North Carolina Chapel Hill Heidi Scott Florida International U Imre Szeman U of Alberta Michael Watts U of California Berkeley Jennifer Wenzel Columbia University Sheena Wilson U of Alberta Rochelle Raineri Zuck U of Minnesota Duluth Catherine Zuromskis U of New Mexico

Music, the Market, and the Marvellous Tommaso Sabbatini, 2024-08-01 Music the Market and the Marvellous examines the French fairy play in the last third of the nineteenth century It is among the first book length studies on the genre the first in a language other than French and the first from a musicological perspective Sabbatini demonstrates that contrary to conventional wisdom the French fairy play was still thriving during the fin de siècle giving rise to innovations such as composerly fairy and scientific fairy The plays the theatre industry and urban geography are discussed together as befits a commercial genre where the marvellous was shaped by the market Recovering this forgotten but once hugely influential repertoire provides an occasion to rethink generic taxonomies of Parisian theatre and the ontology of nineteenth century popular theatre

Louis and Bebe Barron's Forbidden Planet James Wierzbicki, 2005-06-30 Forbidden Planet is a product of the MGM studio which at the time of the production of this film was hardly in the business of making science fiction films Originally planned as a B picture the 1956 Forbidden Planet was praised for its spectacular special effects and brilliant color cinematography The plot practically tingles with sexual innuendo and the dialogue is rich in references to Freudian psychology However in spite of all this the film was marketed to a juvenile audience Notwithstanding its uncommon look and feel perhaps the most unusual aspect of the film is the way it sounds Never before had a major Hollywood effort utilized a score generated entirely by electronic means yet seldom does one find commentary on how Louis and Bebe Barron's score again and again challenges Hollywood norms In addition to placing the composers and film in historical context James Wierzbicki's study offers a deep and thorough analysis of not only the music as used in the film but also of the decontextualized music as presented by the Barrons on the 1977 original soundtrack album The text is generously illustrated with transcriptions and graphs and can serve as a model for the examination of other extended works of electronic music for which no written score has ever existed
