Dimensional Topology Javier Fernández de Bobadilla, Marco Marengon, András Némethi, András Stipsicz, 2024-10-09 The special semester Singularities and low dimensional topology in the Spring of 2023 at the Erdős Center Budapest brought together algebraic geometers and topologists to discuss and explore the strong connection between surface singularities and topological properties of three and four dimensional manifolds The semester featured a Winter School with four lecture series and several focused weeks This volume contains the notes of the lecture series of the Winter School and some of the lecture notes from the focused weeks Topics covered in this collection range from algebraic geometry of complex curves lattice homology of curve and surface singularities to novel results in smooth four dimensional topology and grid homology and to Seiberg Witten homotopy theory and spacification of knot invariants Some of these topics are already well documented in the literature and the lectures aim to provide a new perspective and fresh connections Other topics are rather new and have been covered only in research papers We hope that this volume will be useful not only for advanced graduate students and early stage researchers but also for the more experienced geometers and topologists who want to be informed about the latest developments in the field The Omega Point Mike Hockney, 2013-09-30 History's biggest lie is that there's one God and he created the universe out of nothing Nothing has done more damage to the human psyche than monotheism the doctrine of an all powerful Spy God the divine peeping Tom who sentences to hell anyone who doesn't slavishly obey him In fact the universe is a mathematical God factory and creates infinite Gods over eons of time The universe via dialectical ontological mathematics is converging on the perfect answer to everything the condition known as the Absolute or the Omega Point The universe travels mathematically from Alpha to Omega from perfect potential to perfect actualization The ancient secret society of the Illuminati has waged a war against Abrahamic monotheism and promoted the doctrine of becoming God Mathematics is the Philosopher's Stone that can transmute base metal ordinary humans into gold Gods You too can complete your cosmic journey across countless reincarnations Are you ready to become an Omega Human
