Empty-Base Explanation Yannic Kappes, 2023-08-07 This book develops and applies a novel kind of explanation Empty Base Explanation While ordinary explanations have a tripartite structure involving an explanandum a base of reasons why the explanandum obtains and a link that connects the reasons to the explanandum this book argues that there are explanations whose corresponding set of reasons is empty This novel idea is located in the theoretical background of several fundamental philosophical issues For example it provides a convincing kind of ultimate or final explanation that completely and conclusively explains a phenomenon without involving other phenomena for which further explanations could be demanded The possibility and fruitfulness of empty base explanation is defended by general considerations from the theory of explanation as well as concrete applications to the practice of explanation by status the explanation of logical theorems causal connections and laws of nature self explanation the use of IBE in metaphysics the notion of zero ground which it provides with a solid theoretical footing and ultimate explanation and its application to philosophical cosmology the debate about the PSR and the question of why there is

anything at all For this book Yannic Kappes has received the 2022 De Gruyter Prize for Ontology and Metaphysics from the German Society for Analytic Philosophy GAP

Humanoid Robots Armando Carlos De Pina Filho, 2007-06-01 For many years the human being has been trying in all ways to recreate the complex mechanisms that form the human body Such task is extremely complicated and the results are not totally satisfactory However with increasing technological advances based on theoretical and experimental researches man gets in a way to copy or to imitate some systems of the human body These researches not only intended to create humanoid robots great part of them constituting autonomous systems but also in some way to offer a higher knowledge of the systems that form the human body objectifying possible applications in the technology of rehabilitation of human beings gathering in a whole studies related not only to Robotics but also to Biomechanics Biomimetics Cybernetics among other areas This book presents a series of researches inspired by this ideal carried through by various researchers worldwide looking for to analyze and to discuss diverse subjects related to humanoid robots The presented contributions explore aspects about robotic hands learning language vision and locomotion

Essentials of Computer Organization and Architecture with Navigate Advantage Access Linda Null, 2023-04-13 Essentials of Computer Organization and Architecture focuses on the function and design of the various components necessary to process information digitally This title presents computing systems as a series of layers taking a bottom up approach by starting with low level hardware and progressing to higher level software Its focus on real world examples and practical applications encourages students to develop a big picture understanding of how essential organization and architecture concepts are applied in the computing world In addition to direct correlation with the ACM IEEE guidelines for computer organization and architecture the text exposes readers to the inner workings of a modern digital computer through an integrated presentation of fundamental concepts and principles

NETWORKING 2000. Broadband Communications, High Performance

Networking, and Performance of Communication Networks Guy Pujolle, Harry Perros, Serge Fdida, Ulf Körner, Ioannis Stavrakakis, 2003-06-29 This was the first conference jointly organized by the IFIP Working Groups 6.2, 6.3 and 6.4. Each of these three Working Groups has its own established series of conferences. Working Group 6.2 sponsors the Broadband Communications series of conferences: Paris 1995, Montreal 1996, Lisboa 1997, Stuttgart 1998 and Hong Kong 1999. Working Group 6.3 sponsors the Performance of Communication Systems series of conferences: Paris 1981, Zürich 1984, Rio de Janeiro 1987, Barcelona 1990, Raleigh 1993, Istanbul 1995 and Lund 1998. Working Group 6.4 sponsors the High Performance Networking series of conferences: Aachen 1987, Liège 1988, Berlin 1990, Liège 1992, Grenoble 1994, Palma 1995, New York 1997, Vienna 1998. It is expected that this new joint conference will take place every two years. In view of the three sponsoring Working Groups, there were three separate tracks, one per Working Group. Each track was handled by a different co-chairman. Specifically, the track of Working Group 6.2 was handled by Ulf Körner, the track of Working Group 6.3 was handled by Ioannis Stavrakakis, and the track of Working Group 6.4 was handled by Serge Fdida. The overall program committee chairman was Harry Perros and the general conference chairman was Guy Pujolle. A total of 209 papers were submitted to the conference, of which 82 were accepted. Each paper was submitted to one of the three tracks.

Declarative Networking Boon Thau Loo, Wenchao Zhou, 2022-05-31 Declarative Networking is a programming methodology that enables developers to concisely specify network protocols and services which are directly compiled to a dataflow framework that executes the specifications. Declarative networking proposes the use of a declarative query language for specifying and implementing network protocols and employs a dataflow framework at runtime for communication and maintenance of network state. The primary goal of declarative networking is to greatly simplify the process of specifying, implementing, deploying, and evolving a network design. In addition, declarative networking serves as an important step towards an extensible, evolvable network architecture that can support flexible, secure, and efficient deployment of new network protocols. This book provides an introduction to basic issues in declarative networking, including language design, optimization, and dataflow execution. The methodology behind declarative programming of networks is presented, including roots in Datalog extensions for networked environments and the semantics of long-running queries over network state. The book focuses on a representative declarative networking language called Network Datalog (NDlog), which is based on extensions to the Datalog recursive query language. An overview of declarative network protocols written in NDlog is provided, and its usage is illustrated using examples from routing protocols and overlay networks. This book also describes the implementation of a declarative networking engine and NDlog execution strategies that provide eventual consistency semantics with significant flexibility in execution. Two representative declarative networking systems, P2 and its successor RapidNet, are presented. Finally, the book highlights recent advances in declarative networking and new declarative approaches to related problems.
