Nigel Barley

The Innocent Anthropologist Notes From A Mud Hut:

The Innocent Anthropologist Nigel Barley, 2000-08-23 When British anthropologist Nigel Barley set up home among the Dwayo people in northern Cameroon he knew how fieldwork should be conducted Unfortunately nobody had told the Dwayo His compulsive witty account of first fieldwork offers a wonderfully inspiring introduction to the real life of a cultural anthropologist doing research in a Third World area Both touching and hilarious Barley's unconventional story in which he survived boredom hostility disaster and illness addresses many critical issues in anthropology and in fieldwork *Handbook of Critical and Indigenous Methodologies* Norman K. Denzin, Yvonna S. Lincoln, Linda Tuhiwai Smith, 2008-05-07 Built on the foundation of their landmark Handbook of Qualitative Research it extends beyond the investigation of qualitative inquiry itself to explore the indigenous and non indigenous voices that inform research policy politics and social justice Gendered Fields Diane Bell, Pat Caplan, Wazir Jahan Karim, 2013-07-23 Virtually all anthropologists undertaking fieldwork experience emotional difficulties in relating their own personal culture to the field culture The issue of gender arises because ethnographers do fieldwork by establishing relationships and this is done as a person of a particular age sexual orientation belief educational background ethnic identity and class In particular it is done as men and women Gendered Fields examines and explores the progress of feminist anthropology the gendered nature of fieldwork itself and the articulation of gender with other aspects of the self of the ethnographer **Word Hunters** Hannah Sarvasy, Diana Forker, 2018-02-15 In Word Hunters eleven distinguished linguists reflect on their career spanning linguistic fieldwork Over decades each has repeatedly stood up to physical intellectual interpersonal intercultural and sometimes political challenges in the pursuit of scientific knowledge These scholar explorers have enlightened the world to the inner workings of languages in remote communities of Africa West East and South Amazonia the Arctic Australia the Caucasus Oceania Siberia and East Asia They report some linguistic eureka moments but also discuss cultural missteps illness and the other challenges of pursuing linguistic data in extreme circumstances They write passionately about language death and their responsibilities to speech communities The stories included here the stuff of departmental and family legends are published publicly for the first time **Introductory Readings in Anthropology** Hilary Callan, Brian Street, Simon Underdown, 2013-03-15 Anthropology seeks to understand the roots of our common humanity the diversity of cultures and world views and the organisation of social relations and practices As a method of inquiry it embraces an enormous range of topics and as a discipline it covers a multitude of fields and themes as shown in this selection of original writings As an accessible entry point for upper level students and first year undergraduates new to the study of anthropology this reader also offers guidance for teachers in exploring the subject's riches with their students That anthropology is an immensely expansive inquiry of study is demonstrated by the diversity of its topics from nature conservation campaigns to witchcraft beliefs from human evolution to fashion and style and from the repatriation of indigenous human remains to research on literacy There is no single story of anthropology Taken together

these fundamental readings are evidence of a contemporary vibrant subject that has much to tell us about all the worlds in which we live

Africa and the Americas Richard M. Juang, Noelle Morrisette, 2008-03-12 This encyclopedia explores the many long standing influences of Africa and people of African descent on the culture of the Americas while tracing the many ways in which the Americas remain closely interconnected with Africa Ranging from the 15th century to the present Africa and the Americas Culture Politics and History explores the many ways Africa and African peoples have shaped the cultural life of the Americas and how in turn life in the Americas reverberates in Africa This groundbreaking three volume encyclopedia offers hundreds of alphabetically organized entries on African history nations and peoples plus African influenced aspects of life in the Americas It also features authoritative introductory essays on history culture and religion demography international relations economics and trade and arts and literature In doing so it traces the complex and continuous movement of peoples of African descent to the West the mechanics and lingering effects of colonialism and the slave trade and the crucial issues of cultural retention and adaptation that are essential to our understanding of the effects of globalization

Anthropology , **Overseas Research II** , **The SAGE Handbook of Cultural Anthropology** Lene Pedersen, Lisa Cliggett, 2021-03-31 The SAGE Handbook of Cultural Anthropology is the first instalment of The SAGE Handbook of the Social Sciences series and encompasses major specialities as well as key interdisciplinary themes relevant to the field Globally societies are facing major upheaval and change and the social sciences are fundamental to the analysis of these issues as well as the development of strategies for addressing them This handbook provides a rich overview of the discipline and has a future focus whilst using international theories and examples throughout The SAGE Handbook of Cultural Anthropology is an essential resource for social scientists globally and contains a rich body of chapters on all major topics relevant to the field whilst also presenting a possible road map for the future of the field Part 1 Foundations Part 2 Focal Areas Part 3 Urgent Issues Part 4 Short Essays Contemporary Critical Dynamics

Ethnographic Methods Karen O'Reilly, 2012-03-12 This best selling book designed for researchers embarking on their first ethnographic project has been substantially revised and updated with lots of exercises and advice to guide the embodied and creative practice of ethnography New additions include cyber ethnography sensual visual and mobile ethnographies and field walking

Popularizing Anthropology Jeremy McClancy, Christian McDonough, 2002-11-01 Anthropology written for a popular audience is the most neglected branch of the discipline In the 1980s postmodernist anthropologists began to explore the literary and reflective aspects of their work Popularizing Anthropology advances that trend by looking at a key but previously marginalized genre of anthropology The contributors who are well known anthropologists explore such themes as why so many anthropologists are women how the Japanese have reacted to Ruth Benedict why Margaret Mead became so successful how the French media promote Levi Strauss and Louis Dumont Why Bruce Chatwin tells us more about Aborigines than many anthropologists in Australia how personal accounts of fieldwork have evolved since the 1950s how to write a personal

account of fieldwork Popularizing Anthropology unearths a submerged tradition within anthropology and reveals that from the beginning anthropologists have looked beyond the boundaries of the academy for their listeners It aims to establish the popularization of the discipline as an illuminating topic of investigation in its own right arguing that it is not an irrelevant appendage to the main body of the subject but has always been an integral part of it

Organizational Ethnography Sierk Ybema, Dvora Yanow, Harry Wels, Frans H Kamsteeg, 2009-08-20 Just as newspapers do not typically engage with the ordinary experiences of people's daily lives so organizational studies has also tended largely to ignore the humdrum everyday experiences of people working in organizations However ethnographic approaches provide in depth and up close understandings of how the everydayness of work is organized and how in turn work itself organizes people and the societies they inhabit Organizational Ethnography brings contributions from leading scholars in organizational studies that serve to unpack an ethnographic perspective on organizations and organizational research The authors explore the particular problems faced by organizational ethnographers including questions of gaining access to research sites within organizations the many styles of writing organizational ethnography the role of friendship relations in the field problems of distance and closeness the doing of at home ethnography ethical issues standards for evaluating ethnographic work This book is a vital resource for organizational scholars and students doing or writing ethnography in the fields of business and management public administration education health care social work or any related field in which organizations play a role

In Search of the Sacred Clinton Bennett, 1996-01-01 This text traces the growth and development of two related disciplines anthropology and the study of religions Locating these disciplines within the intellectual climate of the 19th century the study considers the contributions of scholars such as James George Frazer F Max Muller Emile Durkheim Mary Douglas and Clifford Geertz within an historical framework The author argues that both anthropologists and students of religion have abandoned an objective approach in favour of personal engagement with their subjects replacing observation with conversation monologue with dialogue a text based with people based approach He reveals how each discipline has influenced the other both in terms of methodology and by the provision of data The book also explores the criticism levelled at both disciplines that they have aided colonial domination of the developing world

Language Competition and Shift in New Australia, Paraguay Danae Perez, 2019-10-24 This book is an innovative sociolinguistic study of New Australia an Australian immigrant community in Paraguay in 1893 whose descendants today speak Guaraní Providing fresh data on a previously under researched community who are an extremely rare case of language shifting from English heritage language to a local indigenous language the case study is situated within the wider context of the colonial and post colonial spread of English in Latin America over the past century Drawing on insights from linguistic anthropology sociolinguistics Latin American studies and history the author presents the history of the colony before closely analysing the interplay of language and identity in this uniquely diasporic setting This book fills a longstanding gap in the World Englishes and heritage

languages literature and it will be of interest to scholars of colonial and postcolonial languages and minority language more generally Where Global Contradictions are Sharpest Keyan G. Tomaselli, 2005 The iconographic people The Bushmen or San of the Kalahari have been the subject of abundant social research over the years Keyan Tomaselli and his research team from the University of KwaZulu Natal reflect critically on the way the San have been represented He uncompromisingly and aptly illustrates the many ethical contradictions in doing fieldwork among the San **The SAGE Encyclopedia of**

Communication Research Methods Mike Allen, 2017-04-11 Communication research is evolving and changing in a world of online journals open access and new ways of obtaining data and conducting experiments via the Internet Although there are generic encyclopedias describing basic social science research methodologies in general until now there has been no comprehensive A to Z reference work exploring methods specific to communication and media studies Our entries authored by key figures in the field focus on special considerations when applied specifically to communication research accompanied by engaging examples from the literature of communication journalism and media studies Entries cover every step of the research process from the creative development of research topics and questions to literature reviews selection of best methods whether quantitative qualitative or mixed for analyzing research results and publishing research findings whether in traditional media or via new media outlets In addition to expected entries covering the basics of theories and methods traditionally used in communication research other entries discuss important trends influencing the future of that research including contemporary practical issues students will face in communication professions the influences of globalization on research use of new recording technologies in fieldwork and the challenges and opportunities related to studying online multi media environments Email texting cellphone video and blogging are shown not only as topics of research but also as means of collecting and analyzing data Still other entries delve into considerations of accountability copyright confidentiality data ownership and security privacy and other aspects of conducting an ethical research program Features 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats Although organized A to Z front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries Back matter includes a Chronology of the development of the field of communication research a Resource Guide to classic books journals and associations a Glossary introducing the terminology of the field and a detailed Index Entries conclude with References Further Readings and Cross References to related entries to guide students further in their research journeys The Index Reader's Guide themes and Cross References combine to provide robust search and browse in the e version *Ethnographic Constructions of Indigenous Others* George Byrne, 2024-04-30 This book examines the ways in which indigeneity interacts with climate change politics at multiple levels and at the same time offers a self critical reflection on the role of ethnographic research and researchers in this process Through a multi sited ethnography it shows how indigeneity and climate change mitigation

are at this point so intensely intertwined that one cannot be clearly understood without considering the other While indigenous identities have been re defined in relation to climate change it argues that Indigenous Peoples continue to subvert pervasive notions of the nature culture dichotomy and disrupt our understanding of what it means to be human in relation to nature It encourages students and researchers in anthropology international development and other related fields to engage in more meaningful reflection on the epistemic shortcomings of the West including in our own research and to acknowledge the ongoing role of power coloniality extractivism and whiteness in climate change discourses *The Evolved Apprentice* Kim Sterelny,2014-08-29 A new theory of the evolution of human cognition and human social life that emphasizes the role of information sharing across generations Over the last three million years or so our lineage has diverged sharply from those of our great ape relatives Change has been rapid in evolutionary terms and pervasive Morphology life history social life sexual behavior and foraging patterns have all shifted sharply away from those of the other great apes In *The Evolved Apprentice* Kim Sterelny argues that the divergence stems from the fact that humans gradually came to enrich the learning environment of the next generation Humans came to cooperate in sharing information and to cooperate ecologically and reproductively as well and these changes initiated positive feedback loops that drove us further from other great apes Sterelny develops a new theory of the evolution of human cognition and human social life that emphasizes the gradual evolution of information sharing practices across generations and how these practices transformed human minds and social lives Sterelny proposes that humans developed a new form of ecological interaction with their environment cooperative foraging The ability to cope with the immense variety of human ancestral environments and social forms he argues depended not just on adapted minds but also on adapted developmental environments **Writing the Social Text** Richard Brown,2017-07-05 During the past decade it has become commonplace to interpret social and cultural reality the very groundwork of the social sciences as linguistic constructions Not only is society viewed as a text but scientific texts themselves are seen as rhetorical constructions This collection of scholarly essays begins with an overview of this emerging field and covers the specific stylistic practices by which social scientists create objective or true representations of society The volume closes with a consideration of the more telling challenges to the rhetorics of the social sciences and how these might be encompassed or overcome **The Doctoral Experience** Sara Delamont,Paul Atkinson,Odette Parry,2003-12-16 Presents a vivid picture of the experiences of PhD students and their academic mentors in a variety of different disciplines and identifies key themes pervading academic life
