absolute control has long proved a puzzle The author examines the phenomenon of time and asks such fascinating questions as how time impinges on people to what extent our awareness of time is culturally conditioned how societies deal with temporal problems and whether time can be considered a resource to be economized More specifically he provides a consistent and detailed analysis of theories put forward by a number of thinkers such as Durkheim Evans Pritchard L vi Strauss Geertz Piaget Husserl and Bourdieu His discussion encompasses four main approaches in time research namely developmental psychology symbolic anthropology covering the bulk of post Durkheimian social anthropology economic theories of time in social geography and finally phenomenological theories The author concludes by presenting his own model of social cognitive time in the light of these critical discussions of the literature
