## **The Making Of Blind Men A Study Of Adult Socialization:**

*The Making of Blind Men* Robert A. Scott, 2017-09-08 The disability of blindness is a learned social role The various attitudes and patterns of behavior that characterize people who are blind are not inherent in their condition but rather are acquired through ordinary processes of social learning The Making of Blind Men is intended as a systematic and integrated overview of the blindness problem in America Dr Scott chronicles which aspects of this problem are being dealt with by organizations for the blind and the effectiveness of this intervention system He details the potential consequences of blind people becoming clients of blindness agencies by pointing out that many of the attitudes behavior patterns and qualities of character that have been assumed to be given to blind people by their condition are in fact products of socialization As the self concepts of blind men are generated by the same processes of socialization that shape us all Dr Scott puts forth the challenge of reforming the organized intervention system by critically evaluating the validity of blindness workers assumptions about blindness and the blind It is felt that an enlightened work force can then render the socialization process of the blind into a rational and deliberate force for positive change The Making of Blind Men Robert A. Scott, 1976

Regulating the Poor Frances Fox Piven, Richard Cloward, 2012-02-08 Piven and Cloward have updated their classic work

on the history and function of welfare to cover the American welfare state's massive erosion during the Reagan Bush and Clinton years. The authors present a boldly comprehensive brilliant new theory to explain the comparative underdevelopment of the U.S. welfare state among advanced industrial nations. Their conceptual framework promises to shape the debate within current and future administrations as they attempt to rethink the welfare system and its role in American society.

Uncompromising and provocative. By mixing history, political interpretation and sociological analysis, Piven and Cloward provide the best explanation to date of our present situation. No future discussion of welfare can afford to ignore them. Peter Steinfels, *The New York Times Book Review*.

*Anthropology and Epidemiology* C. Janes, R. Stall, S.M. Gifford, 2012-12-06. Over the past two decades, increasing interest has emerged in the contributions that the social sciences might make to the epidemiological study of patterns of health and disease. Several reasons can be cited for this increasing interest. Primary among these has been the rise of the chronic non-infectious diseases as important causes of morbidity and mortality within Western populations during the 20th century. Generally speaking, the chronic non-infectious diseases are strongly influenced by lifestyle variables which are themselves strongly influenced by social and cultural forces. The understanding of the effects of the behavioral factors in, say, hypertension thus requires an understanding of the social and cultural factors which encourage obesity, a sedentary lifestyle, non-compliance with anti-hypertensive medications or other prescribed regimens, and stress. Equally, there is a growing awareness that considerations of human behavior and its social and cultural determinants are important for understanding the distribution and control of infectious diseases. Related to this expansion of epidemiologic interest into the behavioral realm has been the development of etiological models which focus on the psychological, biological, and socio-cultural characteristics of hosts rather than exclusive concern with exposure to a particular agent or even behavioral risk. Also during this period, advances in statistical and computing techniques have made accessible the ready testing of multivariate causal models and so have encouraged the measurement of the effects of social and cultural factors on disease occurrence.
