Post-World War II Masculinities in British and American Literature and Culture Stefan Horlacher,Kevin Floyd,2016-04-08

Analyzing literary texts plays films and photographs within a transatlantic framework this volume explores the inseparable and mutually influential relationship between different forms of national identity in Great Britain and the United States and the construction of masculinity in each country The contributors take up issues related to how certain kinds of nationally specific masculine identifications are produced how these change over time and how literature and other forms of cultural representation eventually question and deconstruct their own myths of masculinity Focusing on the period from the end of World War II to the 1980s the essays each take up a topic with particular cultural and historical resonance whether it is hypermasculinity in early cold war films the articulation of male anxieties in plays by Arthur Miller David Mamet and Sam Shepard the evolution of photographic depictions of masculinity from the 1960s to the 1980s or the representations of masculinity in the fiction of American and British writers such as Patricia Highsmith Richard Yates John Braine Martin Amis Evan S Connell James Dickey John Berger Philip Roth Frank Chin and Maxine Hong Kingston The editors and contributors make a case for the importance of understanding the larger context for the emergence of more pluralistic culturally differentiated and ultimately transnational masculinities arguing that it is possible to conceptualize and emphasize difference and commonality simultaneously

The Life Course Stephen J. Hunt,2017-09-16 Dramatic social transformation in Western society over recent decades has had a profound impact on the way the life course is studied While people continue to experience the implications of class gender ethnicity and of course age they are more than ever able to take personal control of their own lives The Life Course considers how in a diverse and uncertain world the previously predictable stages of life are no longer fixed but increasingly open to change Focusing on continuities and change this book looks not only at the different phases of life but also at the transformation of a number of closely related social institutions such as the family education and the workplace Recognising that the established cradle to grave view is now outdated the trajectory from infancy and youth to later and end of life is followed not as a stable object of study but as a starting point for critical analysis This second edition offers an essential overview of the sociology of the life course incorporating both contemporary and conventional perspectives It calls upon current theorising around the life course as well as on up to date empirical research data This thought provoking text is relevant to researchers and students of life course studies and sociology as well as to those in nursing social work and related caring professions
