Reporting Skin and the Wounded Body in Victorian Britain Diana Garrisi, 2024-12-05 Drawing on a wide range of primary sources this book explains what made skin newsworthy in Victorian Britain It represents a unique contribution to the media history of the human body by delving into the cultural and historical underpinnings of wound representation in Western culture Employing a case study approach the book provides a comprehensive exploration of the interplay between dermatology and the Victorian press This work suggests that there was a mutually constitutive relationship between skin reporting and the formal evolution of news discourse during the nineteenth century Narratives related to skin such as wounds caused by corporal punishment plagues resulting from neglect in workhouses and occupational skin diseases emerged as defining features of Victorian newspapers Notably media coverage of wounded skin assumed a central rhetorical position in debates pertaining to discipline abuse poverty labour and social norms a legacy still discernible in contemporary journalism Analysing the mediation of the wounded body in Victorian Britain offers a unique insight into the foundations of modern journalism It sheds light on the impossibility of maintaining an objective framework when observing and reporting on bodies in pain Paradoxically news writers and commentators of that era navigated this challenge by encapsulating such narratives within rhetorical constructs that provided a template for the evolution of contemporary news values

This Mortal Coil Fay Bound Alberti, 2016 Hamlet's mortal coil which eventually and inevitably we shuffle off when we enter the sleep of death as he puts it has never been static Indeed how the human body and its component parts have been understood individually and collectively has shifted across time shaped by culture religion and technology In this probing and provocative new book Fay Bound Alberti uses the global histories of medicine pathology

and emotions to explore these changing notions Each chapter uses a different focus bones skin sexual organs spine tongue heart revealing how each body part connects to a peculiarly Western notion of expertise one which appropriates one element from the others and ignores their interconnection The themes examined in This Mortal Coil the nature of identity the relationship between the brain and the heart and the gendering of our physical and emotional selves are enduring ones but perceptions of the perfect body or perfect health evolve constantly Moving between the surface and what lies beneath Alberti provides a rich and fascinating accounting of each part shedding light on the role scientific developments from medical care to plastic surgery to cloning plays in how we look at ourselves Written with insight and narrative verve Alberti s provocative book reveals how the mortal coil can be unwound and looked at as if for the first time

Ear Reconstruction Juarez M. Avelar,2017-07-03 This book comes to its second edition intending to broaden the

discussion about the plastic surgical techniques for the reconstruction of the ear. It features a more in depth discussion of the topics previously addressed including chapters on microtia, anotia, the upper pole auricular lobule and complications during and following ear surgery. Furthermore, it addresses a wide variety of deformities of the auricle and surgical topics that were not included in the previous edition such as Reconstruction of the tragus and creation of the external auditory canal. Key considerations when planning or performing a reconstruction of the ear. New concepts on the surgical anatomy of the ear, essential knowledge for plastic surgeons when performing the operation. Traumatic amputation of the ear, a common and severe social and organic problem. Discussions are presented that address the cause of the problem as well as guidelines for surgeons during first aid in order to provide adequate reconstruction. Ear reconstruction for reparation of deformities caused by piercing. Reconstruction of the auricle secondarily to prominent ear surgery. Reconstruction of the ear after human and animal bite. Secondary reconstruction of the ear. Reduction otoplasty, an important procedure whenever the size of the ear negatively impacts the patient's wellbeing or self esteem due to imbalanced facial contours. Features important notes on a procedure that leaves inconspicuous scars and creates a normal and natural appearance of the organ's architecture. Post operative care, special information on how to optimally avoid complications after surgery. Reconstruction of the ear is required in a variety of patients, especially in those with congenital anomalies and associated deformities or those suffering from accidents and trauma affecting the auricle. In this sense, this surgical approach has the ultimate goal of improving aesthetic and functional aspects of congenital and acquired anomalies of the ear. Throughout the book, the goal is to share the author's experience gathered in the course of 43 years dedicated to this challenging field. Descriptions and illustrative photos concerning correction and reconstruction of the auricle caused by prominent ear surgery are presented in detail. The didactic approach, supplemented by color illustrations and surgical photos, helps to demonstrate basic and advanced techniques alike. With forewords by Ivo Pitanguy and Jorge Psillakis. *The People's Home Journal*, 1922. *Endgame, Volume 1*. Derrick Jensen, 2006-06-06. The long awaited companion piece to Derrick Jensen's immensely popular and highly acclaimed works *A Language Older Than Words* and *The Culture of Make Believe*. Accepting the increasingly widespread belief that industrialized culture inevitably erodes the natural world, *Endgame* sets out to explore how this relationship impels us towards a revolutionary and as yet undiscovered shift in strategy. Building on a series of simple but increasingly provocative premises, Jensen leaves us hoping for what may be inevitable: a return to agrarian communal life via the disintegration of civilization itself.
