Anne Taylor, 2009-05-16 For the past forty years Anne Taylor has studied how schools classrooms playgrounds homes museums and parks affect children and how they learn As a result she has developed a holistic sustainable philosophy of learning environment design She argues persuasively that architects must integrate their design knowledge with an understanding of the developmental needs of learners while at the same time educators parents and students must broaden their awareness of the built natural and cultural environment to maximize the learning experience In other words schools and other environments can themselves become three dimensional textbooks When architects are cognizant of newer models of education and educators view the environment as more than a box in which to teach prescribed lessons the result is an informed architecture that enables children to discover the power of their own learning The book presents numerous examples of dynamic designs that are the result of interdisciplinary understanding of place Taylor includes designer perspectives forums derived from commentary by outside contributors involved in school planning and a wealth of photographs of thoughtful and effective solutions to create learning environments from comprehensive design criteria Because the concept of school is enlarged to a community campus the book also spawns a new model of teaching and learning This book is essential reading for educators architects and community members who are anxious to transform education in America and elsewhere Anne Taylor is the most outstanding educator leading proponent and practitioner in the three dimensional textbook field Her work is the finest resource available for connecting students young and old to their learning environments and visa versa Edward E Kirkbride NCARB REFP Before Western man divided the universe into discrete subject matter areas the order in the universe was and still is both interdisciplinary and holistic The branching of trees spiraling of shells meandering of streams and the radial designs of flowers for example represent an analogy of mathematics biology and art The current artificial separation of subject matter is in contrast to the way the world is constructed and the way children perceive it Architecture and the study of the built natural and cultural environment synthesize the world of material things and the world of ideas Further more it helps us to realize that we are a part of not apart from the environment This book is a tool and a gift to designers educators and students everywhere to assist them in seeing the meaning behind all that we view and use for living on earth To know our precious relationship to our surroundings is the intent of this book In this way life is a work of art and each of us is an artist Anne Taylor      **Children and Young**

role in the life of immigrants and other residents on the Lower East Side of Manhattan For over 50 years residents and volunteers at Christodora House provided classes clubs recreational activities and medical and dental clinics for thousands of New Yorkers and then continued to operate programs out of public housing and other locations for more than two decades The building at 143 Avenue B now housing condominiums has had a tumultuous history since 1948 but still stands towering over its tenement neighborhood in the East Village Christodora Inc is now a nonprofit foundation with offices in Midtown Manhattan whose staff works with underserved New Yorkers including youth in the public school system carrying on a long distinguished history of service to the city and country **Moscow Monumental** Katherine Zubovich,2023-01-31 An in

depth history of the Stalinist skyscraper *Software Engineering Education* A.I. Wasserman,P. Freeman,2012-12-06 Software engineering is a term which was coined in the late 1960 s as the theme for a workshop on the problems involved in producing software that could be developed economically and would run reliably on real machines Even now software engineering is more of a wish than a reality but the last few years have seen an increased awareness of the need to apply an engineering type discipline to the design and construction of software systems Many new proposals have been made for the management of software development and maintenance and many methodologies have been suggested for improving the programming process As these problems and solutions become better understood there is a growing need to teach these concepts to students and to practicing professionals As a prelude to the educational process it is necessary to gain an understanding of the software design and development process in industry and government to define the appropriate job categories and to identify the fundamental content areas of software engineering The need for quality education in software engineering is now recognized by practitioners and educators alike and various educational endeavors in this area are now being formulated Yet discussions we had had over the past year or so led us to believe that there was insufficient contact between practitioners and educators with the resultant danger that each group would go off in separate ways rather than working together

REVIEWS     *Philosophical Pragmatism and International Relations* Shane J. Ralston, 2013-05-23 What are the implications of philosophical pragmatism for international relations theory and foreign policy practice According to John Ryder a foreign policy built on pragmatist principles is neither naive nor dangerous In fact it is very much what both the U S and the world are currently in need of Close observers of Barack Obama's foreign policy statements have also raised the possibility of a distinctly pragmatist approach to international relations Absent from the three dominant theoretical perspectives in the field realism idealism and constructivism is any mention of pragmatism except in the very limited instrumentalist sense of choosing appropriate foreign policy tools to achieve proposed policy objectives The key commitments of any international relations approach in the pragmatist tradition could include a flexible approach to crafting policy ends theory integrally related to practice a concern for both the normative and explanatory dimensions of international relations research and policy means treated as hypotheses for experimental testing Following the example of classic pragmatists such as John Dewey and neo pragmatists like Richard Rorty international relations scholars and foreign policy practitioners would have to forgo grand theories instead embracing a situationally specific approach to understanding and addressing emerging global problems Unfortunately commentary on the relationship between philosophical pragmatism and international relations has been limited The authors in *Philosophical Pragmatism and International Relations* remedies this lacuna by exploring ways in which philosophical pragmatism both classic and contemporary can inform international relations theory and foreign policy practice today

**Skyscraper Jails** Zhandarka Kurti, Jarrod B. Shanahan, 2025-03-11 A damning account of the latest transformation in mass incarceration revealing how powerful nonprofits and so called progressives used the language of social movements to build new jails In 2019 after unyielding pressure from activists New York City seemed poised to close the detested Rikers Island penal colony The local press dutifully reported that the end of Rikers was imminent and New Yorkers celebrated the closure of the country's largest urban jail condemned as a moral stain on an otherwise great city The problem however was that the city had not actually committed to closing Rikers And at the same time it laid the groundwork for the construction of more jails a network of skyscraper facilities amounting to the largest carceral construction the city has seen in decades How did this happen In *Skyscraper Jails* scholars and organizers Jarrod Shanahan and Zhandarka Kurti detail how progressive forces in New York City appropriated the rhetoric of social movements and social justice to promise downsized and humane jails The principal advocates of these new jails were not right wing politicians but prominent city activists and progressive non profit organizations As the political coalition that campaigned for the new jails fans out across the United States the story at the heart of *Skyscraper Jails* is at once a case study and a cautionary tale for what will be coming to cities and towns across the United States and beyond

The Project-State and Its Rivals Charles S. Maier,2023-05-16 A new and original history of the forces that shaped the twentieth and twenty first centuries We thought we knew the story of the twentieth century For many in the West after the two world conflicts and the long cold war the verdict was clear democratic values had prevailed over dictatorship But if the twentieth century meant the triumph of liberalism as many intellectuals proclaimed why have the era s darker impulses ethnic nationalism racist violence and populist authoritarianism revived The Project State and Its Rivals offers a radical alternative interpretation that takes us from the transforming challenges of the world wars to our own time Instead of the traditional narrative of domestic politics and international relations Charles S Maier looks to the political and economic impulses that propelled societies through a century when territorial states and transnational forces both claimed power engaging sometimes as rivals and sometimes as allies Maier focuses on recurring institutional constellations project states including both democracies and dictatorships that sought not just to retain power but to transform their societies new forms of imperial domination global networks of finance and the international associations foundations and NGOs that tried to shape public life through allegedly apolitical appeals to science and ethics In this account which draws on the author s studies over half a century Maier invites a rethinking of the long twentieth century His history of state entanglements with capital the decline of public projects and the fragility of governance explains the fraying of our own civic culture but also allows hope for its recovery Time Briton Hadden, Henry Robinson Luce,1960 **Integrated Learning Activities for Young Children** Susan Louise Trostle, Susan Louise Trostle-Brand, Thomas D.
