**Sledge** Martin Lindsay, 1939      Lands that Hold One Spellbound Spencer Apollonio, 2008 Offers an history of East Greenland This book summarises indigenous settlements over four millennia and describes European explorations since the Norse It recounts each of the European and American expeditions relying on the explorers original accounts as well as on the author s narration      *Ice Steel and Fire* Linda Parker, 2013-07-19 The generation that reached maturity in the inter war years had grown up in the shadow of the heroic age of Polar exploration and the sacrifices of a generation in the Great War Their own adventures were to prove as astonishing and heroic as those of a previous generation The members of the British Arctic air route expedition to Greenland including Martin Lindsay Quintin Riley and Freddie Spencer Chapman were to pioneer the weather research methods necessary for Trans Atlantic Flight The university expeditions to Spitsbergen led by George Binney in the 1920s and Sandy Glen in the 1930s traversed and surveyed unexplored ground and contributed to developments in polar flight and radar Glen s expeditions added to the knowledge of Arctic conditions by over wintering Other pre war exploits of these adventurers included a voyage around the world the wrong way and participation in the British Graham Land Antarctic expedition Peter Fleming brother to the creator of James Bond Ian Fleming spent the 1930s exploring Brazil China and Tartary Fleming s exploits are recounted in detail in this book The character skills and endurance obtained in these years set these adventurers and explorers apart as men who were to play a distinguished and heroic role in the Second World War Their expertise in Arctic conditions small boat handling and exploring in all climatic conditions resulted in their participation in all aspects of warfare and arenas of battle particularly as exponents of special operations and as key members of Britain s first special forces Their war service took them from the fjords of Norway and Spitsbergen to the jungles of Burma and Malaya and the beaches of Normandy and Italy They were involved in blockade running covert operations in Yugoslavia Corsica and France and took part in major initiatives such as Ian Fleming s Intelligence gathering force No 30 Assault unit and the raid on St Nazaire Most of these men had known each other before war came in 1939 In some cases they ended up serving alongside one another in wartime The intertwined stories of these characters in peace and war are examples of how the spirit of adventure shown by men in the inter war years contributed to Britain s outstanding role in the Second World War Linda Parker has written an important study that is equally relevant to both the history of British exploration and the genesis and early days of Britain s special forces 1939 45 a quite unique and hitherto unexamined relationship Linda Parker combines teaching History on a part time basis with her writing and is currently completing a PhD at Birmingham University Her main areas of interest are 20th Century Military History Church History and the History of Polar exploration She is a member of the Western Front Association She was born and educated in Wales but now lives in Oxfordshire with her husband and their dog She enjoys walking and travelling ideally together and her ambition is to visit Antarctica Her first book published by Helion was *The Whole Armour of God Anglican Army Chaplains in the Great War* 2009

*Arctic Bibliography* Arctic Institute of North America, 1953      *Sledge : the British Trans-Greenland Expedition, 1934* Lindsay, Martin, 1935      **Into the Great Emptiness: Peril and Survival on the Greenland Ice Cap** David Roberts, 2022-12-13 A Library Journal Best Book of 2022 in Science and Technology A gripping saga and one of Roberts's finest books Jon Krakauer The riveting story of one of the greatest but least known sagas in the history of exploration By 1930 no place in the world was less well explored than Greenland The native Inuit had occupied the relatively accessible west coast for centuries The east coast however was another story In August 1930 Henry George Watkins nicknamed Gino a twenty three year old British explorer led thirteen scientists and explorers on an ambitious expedition to the east coast of Greenland and into its vast and forbidding interior to set up a permanent meteorological base on the icecap 8 200 feet above sea level The Ice Cap Station was to be the anchor of a transpolar route of air travel from Europe to North America The weather on the ice cap was appalling Fierce storms Temperatures plunging lower than 50 Fahrenheit in the winter Watkins's scheme called for rotating teams of two men each to monitor the station for two months at a time No one had ever tried to winter over in that hostile landscape let alone manage a weather station through twelve continuous months Watkins was younger than anyone under his command But he had several daring trips to the Arctic under his belt and no one doubted his judgement The first crisis came in the fall when a snowstorm stranded a resupply mission halfway to the top for many weeks When they arrived at the ice cap there were not enough provisions and fuel for another two man shift so the station would have to be abandoned Then team member August Courtauld made an astonishing offer To enable the mission to go forward he would monitor the station solo through the winter When a team went up in March to relieve Courtauld after weeks of brutal effort to make the 130 mile journey they could find no trace of him or the station By the end of March Courtauld's situation was desperate He was buried under an immovable load of frozen snow and was disastrously short on supplies On April 21 four months after Courtauld began his solitary vigil Gino Watkins set out inland with two companions to find and rescue him David Roberts veteran mountain climber and chronicler of adventures Washington Post draws on firsthand accounts and archival materials to tell the story of this daring expedition and of the epic survival ordeal that ensued

**To the Ends of the Earth** Ranulph Fiennes,2014-09-11 Ranulph Fiennes has entered the public imagination as the intrepid explorer par excellence Taunted by his wife over the challenge of the never before attempted circumpolar navigation of the globe he set off in 1979 on a gruelling 52 000 mile adventure Together with fellow members of 21 SAS regiment Fiennes left from Greenwich travelling over land passing through both ends of the polar axis Completed over two years later it was the first circumpolar navigation of the globe and justifiably entered Fiennes into the record books TO THE ENDS OF THE EARTH is the record of that journey It captures the natural beauty of the landscapes they passed through and the camaraderie that necessarily grows between men who had served in the British forces elite regiment and were now throwing themselves into danger of a different sort Time and again the expedition found themselves in life threatening situations weaving through the pack ice of the Arctic Ocean or sharing a single sleeping bag to ward off the 40 degrees celsius Arctic night The calm and measured approach which made Fiennes such a great expedition leader shines through TO THE ENDS OF THE EARTH deftly recreating the last unexplored regions on earth It is also a book which lays the foundations for what was to come for Fiennes confirming a need to exist outside the comfortable norms the rest of us inhabit As the expedition progresses there is also a mounting sense of tension as attainment of the final goal also spells the end of the adventure TO THE ENDS OF THE EARTH is a compelling account of one journey and Fiennes drive to push himself to ever further extremes
