[Mapping the Darkness](#) Kenneth Miller, 2023-10-03 WINNER OF THE 2024 ASJA BOOK AWARD BIOGRAPHY HISTORY NAMED A BEST BOOK OF THE YEAR 2023 BY THE NEW YORKER NEW YORK TIMES EDITOR S CHOICE SELECTION From award winning journalist Kenneth Miller comes the definitive story of the scientists who set out to answer two questions Why do we sleep and How can we sleep better A century ago sleep was considered a state of nothingness even a primitive habit that we could learn to overcome Then an immigrant scientist and his assistant spent a month in the depths of a Kentucky cave making nationwide headlines and thrusting sleep science to the forefront of our consciousness In the 1920s Nathaniel Kleitman founded the world s first dedicated sleep lab at the University of Chicago where he subjected research participants including himself to a dizzying array of tests and tortures But the tipping point came in 1938 when his cave experiment awakened the general public to the unknown and vital world of sleep Kleitman went on to mentor the talented but troubled Eugene Aserinsky whose discovery of REM sleep revealed the astonishing activity of the dreaming brain and William Dement a jazz bass playing revolutionary who became known as the father of sleep medicine Dement in turn mentored the brilliant maverick Mary Carskadon who uncovered an epidemic of sleep deprivation among teenagers and launched a global movement to fight it Award winning journalist Kenneth Miller weaves together science and history to tell the story of four outsider scientists who took sleep science from fringe discipline to mainstream obsession through spectacular experiments technological innovation and single minded commitment Readers will walk away with a comprehensive understanding of sleep and why it affects so much of our lives A propulsive utterly engrossing history None of it is simple and all of it is captivating The New York Times Mapping the Darkness offers two narratives at once a sweeping journey of discovery about dreams sleep and the terra incognita of unconsciousness and a wake up call about the dangers of chronic exhaustion It s time Mr Miller tells us to take our sleep back The Wall Street Journal

Sleepiness and Human Impact Assessment Sergio Garbarino, Lino Nobili, Giovanni Costa, 2014-04-08 The World Health Organization supports tools and initiatives in Health Impact Assessment to dynamically improve health and well being across different sectors Human Impact Assessment HuIA is a relatively new concept It describes an integrated process that encompasses both Health Impact Assessment and Social Impact Assessment and is used to anticipate the effects of programs projects and decisions on human health and welfare Sleep occupies approximately one third of our lives but its human impact remains largely unrecognized The prevalence of excessive sleepiness is recognized to be increasing in industrialized societies Without doubt sleepiness and fatigue have high costs in terms of both lives lost and socioeconomic impact For example the National Highway Traffic Safety Administration estimates that up to 4% of all fatal crashes are caused by drowsy drivers and that as many as 100 000 deaths

per year in the United States may be due to fatigue related medical errors Sleepiness and Human Impact Assessment provides a uniquely comprehensive exploration of many different facets of sleepiness in our 24 hour society from the new HuIA point of view Among the covered issues are the physiology and pathophysiology of sleep its relationship to daytime alertness fatigue and drugs the relevance of sleep related fatigue in various occupational settings and public safety This book will be of assistance to physicians occupational health professionals ergonomists researchers and decision makers as they strive to understand the full significance of sleepiness and to create a culture of accountability in everyday life without sleep related risks *The Politics of Sleep* S. Williams, 2011-03-29 Why has sleep become increasingly politicized in contemporary society This book provides an account of the politics of sleep in the late modern age The future of sleep has become contested and uncertain something to be defended downsized or even perhaps one day done away with altogether
