in Germany were a significant period of change and upheaval This book on the economic reconstruction of post war West Germany traces the development of economic and socio political ideas and their gradual absorption by mainstream politicians officials and the general public during the period of transition between 1945 and 1949 In the aftermath of World War II several German think tanks political parties and individuals gave impulse to and then shaped the development of a viable socio political and economic model between the extremes of laissez faire capitalism and the collectivist planned economy In their endeavours to bring into effect their particular economic ideas often diametrically opposed to one another the parties of left and right stimulated not only academic and political debate but also public debate about the political and economic reconstruction of occupied post war Germany While all the various neo liberal approaches assigned to the people sovereign and decisive status in the institutional economic order and recognised the interdependence of politics economics and the public one particular school of economic thought outpaced the others in communicating a model of coordinated economic and social policy namely the Social Market Economy Christian Glossner here investigates whether or not it was primarily the subtlety of the political campaign for this model that led to its implementation by the then Economic Council and eventual validation by the German electorate The programmes published by the principal academic and political groups of the time and the practical day to day decisions of the first parliament in post war Germany are analysed with reference to popular preferences By examining both the formative involvement of German parties in post war reconstruction and the role of the public during the process of economic liberalisation this book provides explanations for why the Social Market Economy prevailed as the socio political and economic model for the Federal Republic of Germany It will be of interest to scholars of German economic and twentieth century history      *The Silent Minority* John Goyder,2019-07-09 This book provides characteristics of nonrespondents on sample surveys and reports on several empirical studies undertaken to test theories of survey response and nonresponsive behaviour It presents a predictive model for survey response and evaluates attitudes about surveying      **Identities and Social Change in Britain Since 1940** Michael Savage,2010-05-13 Identities and Social Change in Britain since 1940 examines how between 1940 and 1970 British society was marked by the imprint of the academic social sciences in profound ways which have an enduring legacy on how we see ourselves It focuses on how interview methods and sample surveys eclipsed literature and the community study as a means of understanding ordinary life The book is the first to draw extensively on archived qualitative social science data from the 1930s to the 1960s which it uses to offer a unique personal and challenging account of post war social change in Britain It also uses this data to conduct a new kind of historical sociology of the social sciences one that emphasises the discontinuities in knowledge forms and which stresses how disciplines and institutions competed with each other for reputation Its emphasis on how social scientific forms of knowing eclipsed those from the arts and humanities during this period offers a radical re thinking of the role of expertise today which will provoke social scientists scholars in the humanities and the general reader alike      Foundations for

*Identities and Social Change in Britain since 1940* Mike Savage, 2010-05-13 Identities and Social Change in Britain since 1940 examines how between 1940 and 1970 British society was marked by the imprint of the academic social sciences in profound ways which have an enduring legacy on how we see ourselves It focuses on how interview methods and sample surveys eclipsed literature and the community study as a means of understanding ordinary life The book shows that these methods were part of a wider remaking of British national identity in the aftermath of decolonisation in which measures of the rational managed nation eclipsed literary and romantic ones It also links the emergence of social science methods to the strengthening of technocratic and scientific identities amongst the educated middle classes and to the rise in masculine authority which challenged feminine expertise This book is the first to draw extensively on archived qualitative social science data from the 1930s to the 1960s which it uses to offer a unique personal and challenging account of post war social change in Britain It also uses this data to conduct a new kind of historical sociology of the social sciences one that emphasises the discontinuities in knowledge forms and which stresses how disciplines and institutions competed with each other for reputation Its emphasis on how social scientific forms of knowing eclipsed those from the arts and humanities during this period offers a radical re thinking of the role of expertise today which will provoke social scientists scholars in the humanities and the general reader alike
