Consumer Behaviour, 1st Australia and New Zealand Edition Ayalla Ruvio,Dawn Iacobucci,Valentina Melnyk,Pauline Campbell,2025-08-25 **China's Youth** Li Chunling,2021-09-28 Understanding the young adults who came of age during the rise of China's economic and global power This book by a prominent Chinese sociologist explores how China's youth will influence the country's future Focusing on millennials those born between the early 1980s and the mid 1990s the book examines the status lifestyles attitudes values and behaviors of this key segment of the country's population Li Chunling's study presents a native Chinese perspective on the increasingly diverse generation that at some point will assume leadership of the country Among the key questions addressed in the book are How do Chinese millennials differ both from preceding generations in China and from their counterparts around the world How can current and future relations between Chinese millennials and the Chinese government be assessed And what are the factors or fault lines that have shaped the intra generational differences among China's young people Members of this age cohort are extraordinary and in some respects unique in contemporary China Their ascent has accompanied five historic and far reaching developments These include China's rapid economic rise the adoption of the one child per family policy the largest domestic rural to urban migration in Chinese history the opening of extensive educational opportunities abroad and the arrival of the digital era Young Chinese citizens have developed a comprehensive understanding of the world much faster than previous generations millennials see themselves not as extensions of the past but rather as the innovators of the country's future Through expansive and in depth empirical research on Chinese millennials and younger age cohorts people in their late teens and early 20s Dr Li's book illustrates how China's younger adults reflect the growing diversity and persistent inequality in society The book also explores how their distinct characteristics and views will shape the country's trajectory For the outside world developing a better understanding of this unique generation is an urgent task given that China now has more influence on the global economy and regional security than at any other point in modern history *Youth in Europe: An international empirical study about the impact of religion on life orientation* Hans-Georg Ziebertz,William K. Kay,2005 This book draws

upon empirical data collected from 10 000 adolescent young people in 10 European countries The first volume of this project was about young people s life perspectives and the second about their religious attitudes and practices The current and final volume of this cross cultural study connects both research dimensions The analyses make clear that the influence of religion on values life orientation and politics differs strongly between different groups within Christianity and between Christians Jews and Muslims Many findings contain obvious surprises because they refute mainstream opinion on many topics The book gives detailed and new insights in the public relevance of the religiosity of young people across Europe All three volumes together are indispensable for scholars who work in public religious and educational contexts
