coastal fisheries in Asian countries Silvestre, G. et al,2003-12-08 In Asia the fisheries sector is important in terms of food security livelihoods and foreign exchange earnings However as in many parts of the world there are signs that capture fisheries are fully exploited or overfished Management of fisheries in the region is often hampered by lack of information on the status of fisheries in terms of biological social economic policy and governance aspects This regional project documents an alarming decline on coastal fishery resources based on historic research surveys in South and Southeast Asia Socio economic analyses and policy reviews highlight the importance of the fisheries sector but also the challenges facing it

Potential interventions to improve fisheries management in the countries are outlined and defined with environmental socioeconomic and institutional objectives
