Advances in Cancer Research , 1997-05-02 Volume 71 of Advances in Cancer Research begins with Morgan and Kastan presenting data on the roles of p53 and ATM in cell cycle progression and cell death in response to DNA damage and how this information may lead to targets for improved cancer therapies Kok et al Review the methodological advantages and limitations to localizing tumor suppressor genes especially those on the short arm of chromosome 3 Peltomaki and de la Chapelle describe research on mismatch repair genes and their effects on colorectal cancer McKenna and Cotter present findings on the functions and failures of apoptosis in the hematopoietic system Ravitz and Wenner review TGF B and how it controls and affects cell cycle progression in a variety of cell types Andrew Simpson presents data on the mutation frequencies of microsatellites in human carcinogenesis Naor and colleagues present research on a multitude of tumors expressing levels of CD44 and discuss how CD44 may be used as a target for cancer therapy Luisa Villa discusses various aspects of HPV and the potential clinical use of HPV testing in cervical cancer prevention programs Last Disis and Cheever review the studies that define HER 2 neu specific immunity in patients with cancer and the current vaccine strategies for generating specific immunity **Amyotrophic Lateral Sclerosis** V. Cosi, 2013-03-09 An International Conference on Therapeutic Psychological and Research Aspects of Amyotrophic Lateral Sclerosis was held in Varese Italy from the 27th to the 31st March 1985 Health care professionals scientists patients and their families from twenty countries around the world participated in this meeting The objectives of the Varese conference were the following a To provide a forum for the

proponents of the various paths of research into ALS b To correlate the useful therapies employed regionally for the purpose of developing a common guide for patients families and supporting professionals c To encourage self examination by the health care professionals into the psychological barriers imposed by a diagnosis of terminal illness for which there is no known cause or cure Not surprisingly there were no announcements of breakthroughs or miracle cures which are nonetheless hoped for in the confrontation of a disease such as ALS It is fair to say however that Varese provided the context for a thorough review of what is known about ALS and we hope that the papers will renew some of the enthusiasm which has characterized this conference The book contains six sections Basic Research Aspects Diagnostic Tools Clinical Management Therapeutic Trials Psychological Aspects and the Epidemiology of ALS Certain aspects such as pathological studies and animal models have not been covered these subjects were partially treated during the informal sessions Nevertheless the large number of papers bears evidence to the growing interest in ALS and to the success of the Varese meeting
