**Writing for Social Scientists** Howard S. Becker, 2010-10-19 Students and researchers all write under pressure and those pressures most lamentably the desire to impress your audience rather than to communicate with them often lead to pretentious prose academic posturing and not infrequently writer's block Sociologist Howard S Becker has written the classic book on how to conquer these pressures and simply write First published nearly twenty years ago Writing for Social Scientists has become a lifesaver for writers in all fields from beginning students to published authors Becker's message is clear in order to learn how to write take a deep breath and then begin writing Revise Repeat It is not always an easy process as Becker wryly relates Decades of teaching researching and writing have given him plenty of material and Becker neatly exposes the foibles of academia and its publish or perish atmosphere Wordiness the passive voice inserting a the way in which when a simple how will do all these mechanisms are a part of the social structure of academic writing By shrugging off such impediments or at the very least putting them aside for a few hours we can reform our work habits and start writing lucidly without worrying about grades peer approval or the literature In this new edition Becker takes account of major changes in the computer tools available to writers today and also substantially expands his analysis of how academic institutions create problems for them As competition in academia grows increasingly heated Writing for Social Scientists will provide solace to a new generation of frazzled would be writers

**Beethoven and the Construction of Genius** Tia DeNora, 1995 It was high time that someone tried to explain more fully and on the basis of the known documents the course of Beethoven's meteoric rise to fame in Vienna at the end of the eighteenth century I would consider this cleverly written and authoritative book to be the most important about Beethoven in twenty five years No one considering the subject will be able to overlook DeNora's research H C Robbins Landon author of Beethoven His Life Work and World This is a study with the power to reshape our perceptions of Beethoven's first decade in Vienna and substantially refine our notions of the creation and foundations of Beethoven's career William Meredith Ira Brilliant Center for Beethoven Studies San Jose State University Professor DeNora's achievement in placing Beethoven and the reception of Beethoven's music in social context is all the more impressive because it goes so much against the grain of conventional habits of thought In illuminating how changing social institutions created opportunities for Beethoven to gain contemporary and posthumous recognition and in so doing created new forms for thinking and talking about musical achievement the author at once provides fresh insights into the institutional origins of classical music and offers an exemplary contribution to the sociological study of the arts Paul DiMaggio Princeton University An important landmark in our understanding of the relationship of the creative musician to society and a vital contribution to debates about the central phenomenon which distinguishes Western music from other musical traditions the phenomenon of the Great Composer Julian Rushton University of Leeds This original book argues that Beethoven's high reputation was created as much by the social cultural agendas of his aristocratic Viennese patrons in the 1790s as by the qualities of his music DeNora's persuasive reading of this momentous cultural artistic event will be welcome to sociologists for its successful contextualization of a hero of absolute music as well as to musicologists and music lovers who wish to move beyond the myth of Beethoven as the man who freed music James Webster Cornell University Lucid well researched and theoretically informed Beethoven and the Construction of Genius is one of the best works yet published in the historical sociology of culture DeNora makes important contributions not only to our knowledge of Beethoven and of the social construction of genius but to the general problems of how identities are created shaped and sustained and of how aesthetic claims gain authority Craig Calhoun University of North Carolina
