*Corporate versus National Interest in US Trade Policy* Richard L. Bernal, 2020-10-31 This book provides a history of the WTO US EU banana dispute through the lens of a major actor the US owned multinational firm Chiquita Brands International It documents and explains how Chiquita succeeded in having the Clinton administration pursue a trade policy of forcing the European Union to dismantle its preferential banana import regime for exports from the small English speaking Caribbean ESC countries The export of bananas was critically important to the social stability and economic viability of these countries and that was in the national security interest of the United States The experience indicates that succeeding in this goal was detrimental to U S national security interest in the Caribbean

**Resource Sustainability and Caribbean Development** Duncan F. M. McGregor, David Barker, Sally Lloyd-Evans, 1998 Resource Sustainability and Caribbean Development follows on from Barker and McGregor's earlier edited volume Environment and Development in the Caribbean Geographical Perspectives 1995 and aims to focus more specifically on the theme of sustainability and to examine research contributions of geographers to problems of sustainability in the Caribbean region While the problems of environmental degradation have increased in recent decades the ability of Caribbean governments to cope with the consequences appears to have been eroded There is however a growing recognition within the region of the need for development strategies that

focus on the social needs of the people yet simultaneously protect the fragile natural environment It is hoped that the research presented here will serve to inform the wider research and decision making community of the main problems associated with resource sustainability in the region and of some of the major research directions crucial to the alleviation of these problems Preface      **The Contemporary Caribbean** Robert B. Potter, David Barker, Thomas Klak, Denis

Conway, 2015-07-17 This text focuses on the contemporary economic social geographical environmental and political realities of the Caribbean region Historical aspects of the Caribbean such as slavery the plantation system and plantocracy are explored in order to explain the contemporary nature of and challenges faced by the Caribbean The book is divided into three parts dealing respectively with the foundations of the Caribbean rural and urban bases of the contemporary Caribbean and global restructuring and the Caribbean industry tourism and politics      **The Political Ecology of Bananas** Lawrence S.

Grossman, 2000-11-09 This study of banana contract farming in the Eastern Caribbean explores the forces that shape contract farming enterprises everywhere capital the state and the environment Employing the increasingly popular framework of political ecology which highlights the dynamic linkages between political economic forces and human environment relationships Lawrence Grossman provides a new perspective on the history and contemporary trajectory of the Windward Islands banana industry He reveals in rich detail the myriad impacts of banana production on the peasant laborers of St Vincent and the Grenadines Grossman challenges the conventional wisdom on three interrelated issues central to contract farming and political ecology First he analyzes the process of deskilling and the associated significance of control by capital and the state over peasant labor Second he investigates the impacts of contract farming for export on domestic food production and food import dependency And third he examines the often misunderstood problem of pesticide misuse Grossman's findings lead to a reconsideration of broader debates concerning the relevance of research on industrial restructuring and globalization for the analysis of agrarian change Most important his work emphasizes that we must pay greater attention to the fundamental significance of the environmental rootedness of agriculture in studies of political ecology and contract farming      The Banana James Wiley, 2008 The Banana demystifies the banana trade and its path

toward globalization It reviews interregional relationships in the industry and the changing institutional framework governing global trade and assesses the roles of such major players as the European Union and the World Trade Organization It also analyzes the forces driving today's economy such as the competitiveness imperative diversification processes and niche market strategies Its final chapter suggests how the outcome of the recent banana war will affect bananas and trade in other commodities sectors as well      **Southeast Asian Affairs 2019** Daljit Singh, Malcolm

Cook, 2019-04-10 Southeast Asian Affairs first published in 1974 continues today to be required reading for not only scholars but the general public interested in in depth analysis of critical cultural economic and political issues in Southeast Asia In this annual review of the region renowned academics provide comprehensive and stimulating commentary that furthers

understanding of not only the region's dynamism but also of its tensions and conflicts. It is a must read. Suchit Bunbongkarn, Emeritus Professor, Chulalongkorn University. Now in its forty-sixth edition, *Southeast Asian Affairs* offers an indispensable guide to this fascinating region. Lively, analytical, authoritative, and accessible, there is nothing comparable in quality or range to this series. It is a must read for academics, government officials, the business community, the media, and anybody with an interest in contemporary Southeast Asia. Drawing on its unparalleled network of researchers and commentators, ISEAS is to be congratulated for producing this major contribution to our understanding of this diverse and fast-changing region to a consistently high standard and in a timely manner.

Hal Hill, H.W. Arndt Professor of Southeast Asian Economies, Australian National University.

**Poison Powder** Gregory S. Wilson, 2023-04-01. In 1975, workers at Life Science Products, a small makeshift pesticide factory in Hopewell, Virginia, became ill after exposure to Kepone, the brand name for the pesticide chlordecone. They made the poison under contract for a much larger Hopewell company, Allied Chemical. Life Science workers had been breathing in the dust for more than a year. Ingestion of the chemical made their bodies seize and shake. News of ill workers eventually led to the discovery of widespread environmental contamination of the nearby James River and the landscape of the small working-class city. Not only had Life Science dumped the chemical but so had Allied when the company manufactured it in the 1960s and early 1970s. The resulting toxic impact was not only on the city of Hopewell but also on the faraway fields where Kepone was used as an insecticide. Aspects of this environmental tragedy are all too common: corporate avarice, ignorance, and regulatory failure combined with race and geography to determine toxicity and shape the response. But the Kepone story also contains some surprising medical, legal, and political moments amid the disaster. With *Poison Powder*, Gregory S. Wilson explores the conditions that put the Kepone factory and the workers there in the first place and the effects of the poison on the people and natural world long after 1975. Although the manufacture and use of Kepone is now banned by the Environmental Protection Agency, organochlorines have long half-lives, and these toxic compounds and their residues still remain in the environment.

**Fair Bananas!** Henry J. Frundt, 2022-04-19. Bananas are the most consumed fruit in the world. In the United States alone, the public eats about twenty-eight pounds of bananas per person every year. The total value of the international banana trade is nearly five billion dollars annually, with 80 percent of all exported bananas originating in Latin America. There are as many as ten million people involved in growing, packing, and shipping bananas, but American consumers have only recently begun to think about them and about their working conditions. Although European nations have helped create a fair trade system for bananas grown in Mediterranean and Caribbean regions, the United States, as a country, has not developed a similar system for bananas grown in Latin America, where large corporations have dominated trade for more than a century. *Fair Bananas* is one of the first books to examine the issue of fair trade bananas. Specifically, Henry Frundt analyzes whether a farmer-worker-consumer alliance can collaborate to promote a fair trade label for bananas much like those for fair trade coffee and chocolate that will appeal to North American shoppers.

Researching the issue for more than ten years Henry Frundt has elicited surprising and nuanced insights from banana workers Latin American labor officials company representatives and fair trade advocates Frundt writes with admirable clarity throughout the book which he has designed for college students who are being introduced to the subject of international trade and for consumers who are interested in issues of development Frankly though Fair Bananas will appeal to anyone who wants to know more about bananas including where they come from and how they get from there to here

**Living at the Borderlines** Cynthia Barrow-Giles, Don D. Marshall, 2003 The idea that the Caribbean could be devolving downward in wealth function and sovereignty has become a recurrent theme in both academic and popular literature By focusing on some of the current issues facing Caribbean nation states the editors and contributors to this volume hope to inform and contribute to the ongoing debate on the broad themes of Sovereignty and Development and the prospects for survival of Caribbean nation states in a globalised world While some of the papers seek to describe and analyse the range and complexity of the challenge to national sovereignty and public policy autonomy others focus on issues relating to small country size gender and ethnic tensions security constitutional reform and regional integration The result is a balanced perspective the contributors do not gloss over the problem faced by the region At the same time they do not present a hyper pessimistic picture of Caribbean development prospects What gives the collection a particular dynamism is the way in which the authors have challenged the terrain of political possibilities traditionally defined for small peripheral societies

**In the Shadows of State and Capital** Steve Striffler, 2002 In the Shadows of State and Capital tells the story of how Ecuadorian peasants gained and then lost control of the banana industry

*Second Skin* Anne Anlin Cheng, 2023 What does a black burlesque star have to do with some of the most enduring and passionate ideas in modern aesthetic theory Josephine Baker emerges in this untold story as a principal figure in the drama behind the making of Euro American Modernism Instead of seeing her nude performances as a Primitivist given Cheng argues that Baker's skin was central to debates about and desire for pure surface that crystalized at the convergence of modern art architecture machinery and philosophy Taking the reader across the Atlantic through real stages and imagined houses banana plantations and ocean lines metallic bodies and radiant cities this study tracks the ardent and protean conversation between the making of a Modernist style and the staging of a new black visuality In this account Baker and the Modernists known to have adored and objectified her in fact share a common dream the fantasy of remaking and wearing the skin of the other
