Surviving Armageddon Solutions For A Threatened Planet:

Surviving Armageddon Bill McGuire, 2005 What do earthquakes magma asteroid 1950DA and global warming have in common Not only are they all natural disasters already under way but they are ones scientists are now working to prevent predict or at least limit their impact on civilisation as we know it Using the latest chilling data and taking care to draw a clear line between science fiction and fact McGuire will discuss various ways that scientists have started preparing for survival On earth solutions range from space reflectors to prevent global warming to pressure relieving robot excavators to stop volcanic eruptions In space NASA plans to have all threatening asteroids larger than 1km detected by 2008 thereby enabling us to predict possible collisions up to 2880 and developing rocket motors to gently nudge them out of Earth's path Viewed as the natural successor to *A Guide to the End of the World* this book provides solutions rather than problems and concludes optimistically with ways to use technology to protect our society and planet from global catastrophe as well as to foster an environment where all life on earth can thrive

Surviving Armageddon Bill McGuire, 2005-06-09 The Asian tsunami of Christmas 2004 killed more than a quarter of a million people and shattered the lives of many more The ruthless indifference of the forces of nature to our fragile existence on the surface of the planet could not have been more shockingly demonstrated nor the sheer scale of their power more tragically displayed Massive earthquakes and super eruptions collision with vast boulders from space the insidious potentially catastrophic dangers of global warming what can mere humans do against these natural hazards which have devastated life on Earth in the past and could do so again Are there real alternatives to simply awaiting our doom Bill McGuire believes there are Following on from *A Guide to The End of the World* in which he presented a frightening vision of the hazards that face us in *Surviving Armageddon* he guides us through the major threats assessing the solutions that have been proposed from the reasonable to the bizarre There really are ways in which we can perhaps not prevent but limit the damage caused by future disasters he concludes As a volcanologist McGuire has sensed at first hand the dangers of volcanic eruptions and he was deeply involved in the scientific analysis of the Asian tsunami In this lively narrative he combines the science behind natural hazards with enthralling accounts of his own experiences and narrow escapes while working in some of the most dangerous parts of the world He gives us a down to Earth view of how we might just deflect Armageddon and live to tell the tale

And the Lamb Wins Simon Ponsonby, 2010-01-01 There is a growing collective interest in the end times But with that interest comes a barrage of confusing and sometimes misleading ideas and messages With so much available information how can we discern fact from fiction Pastor Simon Ponsonby takes an eye opening look at what the future holds Cutting through today's cultural din Simon examines provocative topics including Biblical indicators of the end times The return of Jesus Christ The tribulation and the rapture Israel's place in the future The true role of the antichrist Simon examines each event through the lens of solid scripture and shares how we can realistically and positively react to these revelations in our daily life Most of all we'll find that whatever
