Revolutionary Mothering War and Exile in the 21st Century Mai'a Williams shares her experiences working in conflict zones and with liberatory resistance communities as a journalist human rights worker and midwife in Palestine Egypt Chiapas Berlin and the U S while mothering her young daughter Aza She first went to Palestine in 2003 during the Second Intifada to support Palestinians resisting the Israeli occupation In 2006 she became pregnant in Bethlehem West Bank By the time her daughter was three years old they had already celebrated with Zapatista women in southern Mexico and survived Israeli

detention and during the 2011 Arab Spring they were in the streets of Cairo protesting the Mubarak dictatorship She watched the Egyptian revolution fall apart and escaped the violence like many of her Arab comrades by moving to Europe Three years later she and Aza were camping at Standing Rock in protest of the Dakota Access Pipeline and co creating revolutionary mothering communities once again This is a story about mothers who are doing the work of deep social transformation by creating the networks of care that sustain movements and revolutions By centering mothers in our organizing work we center those who have the skills and the experience of creating and sustaining life on this planet This Is How We Survive illuminates how mothering is a practice essential to the work of revolution It explores the heartbreak of revolutionary movements falling apart and revolutionaries scattering across the globe into exile And most importantly how mamas create no matter the conditions the resilience to continue doing revolutionary work

 beliefs and religious practices of the indigenous peoples This volume addresses the ongoing thrust in archaeology to take the
 next step after preserving the past interpreting that past for the future That future audience includes both local citizens and
 tourists who may have little background in archaeology anthropology or the history of the culture featured Walker presents
 the key components of the anthropological study of tourism as a global phenomenon with particular emphasis on the more
 prominent arguments for how and why tourism is a universal and meaningful human activity The highly controversial topic of
 authenticity is examined with special attention given to how authentic has been defined and how it relates to the ways in
 which archaeological sites artifacts and cultural traditions are presented or not presented to the visiting public The
 ephemeral promise of authenticity drives the heritage tourism industry which is a key consideration for the long term
 economy of the Maya Riviera and elsewhere Through analysis of seven archaeological sites on the Yucatan peninsula that are

open to heritage touring Walker reveals the planned growth of the Maya Riviera since the early 1970s and examines the impact of international tourism on both ancient structures and the contemporary Maya people and culture **Pictish**

The Rise and Fall of Paradise I. K. Fleming, 2015-12-14 Paradise or the ordered universe or the cosmos began with the discovery of time and its revelation that the universe operates according to universal laws As Earth's people endeavored to live in harmony with these newfound principles Paradise evolved into a religion as well as a science and its truths were meticulously recorded in the myths and symbols that are the archives of preliterate peoples worldwide The Rise and Fall of Paradise follows Paradise from its distant prehistoric beginnings through the many millennia of its evolution to its destruction in the Fall Though now deemed irretrievably lost enough of the ancient Paradise's scattered symbolism survives to offer an alternative perspective on how life might be lived on this Earth **JNCI, Journal of the National Cancer**

This volume collects chapters that examine representation theory as connected with affine Lie algebras and their quantum analogues in celebration of the impact Vyjayanthi Chari has had on this area. The opening chapters are based on mini courses given at the conference Interactions of Quantum Affine Algebras with Cluster Algebras, Current Algebras and Categorification held on the occasion of Chari's 60th birthday at the Catholic University of America in Washington D C June 2018. The chapters that follow present a broad view of the area featuring surveys, original research and an overview of Vyjayanthi Chari's significant contributions. Written by distinguished experts in representation theory, a range of topics are covered including String diagrams and categorification, Quantum affine algebras and cluster algebras, Steinberg groups for Jordan pairs, Dynamical quantum determinants and Pfaffians, Interactions of Quantum Affine Algebras with Cluster Algebras, Current Algebras and Categorification. This will be an ideal resource for researchers in the fields of representation theory and mathematical physics.
